HICKS NURSERIES
Westbury, Long Island, New York
A CHARMING view on estate of Edmond A. Guggenheim, Roslyn, L. I., designed and planted by Hicks Nurseries. Better get our help and advice in developing your landscape.

Interest in improving home landscapes was never so widespread as it is at the present time. The modern trend in home-making is to have the outside as beautiful as within.

The charm of flowering plants and trees, tastefully arranged to create a veritable living-room outdoors, is irresistible, and the prospect of planning a place outdoors which is attractive, livable, and comfortable—where the whole family can find countless hours of enjoyment—is fraught with unexpected adventure.
INTRODUCTION

We again take great pleasure in presenting this booklet, which is issued yearly for the thousands of America's busy men and women who appreciate the refined pleasures and beauty attached to home landscapes, and who desire to develop the greatest amount of beauty and comfort at a minimum of expense and care. The grounds should be considered as an outdoor living-room, or a series of rooms, and should be made harmonious, comfortable, and beautiful.

People come to Hicks Nurseries because they find full value and satisfaction. They acknowledge Hicks Nurseries as an authority for expert advice, and have found that our guarantee really means what it says—see bottom of page.

Long Island was settled by flower-loving people, such as the Dutch, English, and French. Today the beauty of Long Island's home landscapes is famed the world over, and Hicks Nurseries has contributed much toward their development. Our operations are not, however, confined to just Long Island. Hundreds of people in other parts of the country enjoy the satisfaction of Hicks' trees and plants.

The Nursery was founded in 1853 by Isaac Hicks, the grandfather of Henry Hicks, who is now the head of the firm. For seventy-five years the testing and experimenting with plants from different parts of the world has been going on. This experimenting has developed knowledge as to the best plants to grow to meet the various conditions of soil and locations. You need our help and advice in selecting plants best suited to develop your landscape.

Nature fits plants to soil and environment. The leaf-texture of a dry-ground oak is resistant to transpiration of sap. Feel one of these oak leaves with one hand, and with the other a leaf of a willow. You will then realize how nature adapts texture to environment. Another example is the study of root-habits. The little tree builds, first, a deep foundation, and stores away most of its structure below the ground; that is, it will be three times bigger below the ground than above for the first two or three years. A tree native to wet ground in the same time makes a big top and a small root-system below. It does not have to store up for time of drought.

You are welcome at Hicks Nurseries whether you come for pleasure or to buy. It is a botanic garden of 400 acres with 20 miles of good roads enabling you to drive or walk around. There are thousands of interesting trees and plants for you to see and study. Visit the Nursery the same as you do the museum and zoo. Come often throughout the season. There are wonderful displays of bloom—large blocks of Azaleas, Rhododendrons, Peonies, Irises, Phlox, Lilacs, and other flowering plants.

For quick selection of plants to take home in your car, visit the Sales Department. Some are ready in pots, others freshly dug and temporarily heeled in, ready to pull up; others can be dug for you in a reasonable time. You can arrange to call or send for them later.

If your place is not already a beauty-spot, why not make it so? You can do it gradually if you like—extend it over several seasons, spending $10 or $20 at a time, and adding one unit after another. Or if you want to make one job of it, tell us what you feel inclined to spend—perhaps $25, perhaps $200—and let us help you invest it to the best advantage.

GUARANTEE

We guarantee every plant from our nursery and give new ones to replace those that do not grow satisfactorily. The cost of planting and transportation of replaced trees is borne by the purchaser.

TERMS

Prices are for stock loaded at the nursery. Five plants are sold at the ten rate and fifty at the hundred rate. We charge for delivery and planting, also for packing for shipment if considerable labor and material are used. On small shipments, such as sent by parcel post, no packing charge is made.
A view of the Propagating Department of Hicks Nurseries. Here baby plants are produced and nursed along until salable. A visit to this manufacturing plant will help you to realize the value of good plants.

A block of large shade trees in Hicks Nurseries. You cannot afford to wait half a lifetime to enjoy the benefits of a tree. We have grown many of them, ready and waiting for you to select.
Hicks Nurseries, Westbury, N. Y.

HICKS SERVICE

The one big advantage about Hicks Service is our guarantee. Everything purchased from our Nurseries is guaranteed to grow satisfactorily. It is our aim to give absolute satisfaction. Our high reputation for good work is our greatest asset. You have the satisfaction of being able personally to select your plants, if you want to, plus the satisfaction you have in dealing with a firm which you know is reliable and which has a history of fair dealing.

We are particularly anxious to serve the small home-owner. People of modest means cannot afford to take a chance with an investment. At Hicks Nurseries you get full value for your investment. There are 400 acres, with millions of plants being grown for quality and economy for you to choose from. You buy direct from the grower, and it is not reasonable to expect to get better plants cheaper elsewhere. Before placing an order, let us show you the value we can give for the amount of your investment.

Our large tree-moving operations may have conveyed the impression of high price, but comparing quality of plants and execution of work, Hicks Nurseries will do your planting the most economically. Don't be deceived into buying poor plants, carelessly dug and planted.

Another department of Hicks Nurseries is the Bureau of Information. Expert advice is freely given on any questions pertaining to trees and plants.

Large Expert Staff Available. A letter or telephone call (Westbury 67 or 68) will bring one of our representatives to your assistance. If not within reach, send us photographs or a rough plan, with dimensions, and we will submit planting plan and estimate without cost to you. If you have ideas regarding the planting, we will try to incorporate them in the plan.

Block of Iris at Hicks Nurseries. You will enjoy a visit to the Hardy Flower Department
FOUNDATION PLANTING

E REFER to that part of the landscape whose function it is to connect the house with its surroundings. It is probably the most important landscape problem of the average home-owner, and seldom receives the thought and proper treatment required.

The completed appearance of a house requires an appropriate foundation planting which should be put in as soon as the building is finished. Its purpose is to connect house walls with lawn and topography. A new home without an attractive planting is almost as incomplete as the interior without draperies, etc.—not absolutely necessary for physical comfort, but needed for complete mental enjoyment.

The style of architecture determines largely the landscape treatment, but whatever the treatment may be, it is the most intimate part of the landscape and therefore deserves the most profound study. Not only should beauty be discovered in the details at close range, but also in the masses as viewed at a distance. The principles of good landscape planting are not complicated—simplicity is of paramount importance. Professors of landscape architecture warn that too much is often planted, especially around larger buildings. It is better to show some of the foundation by bringing up a group of foliage between the windows with, perhaps, a high point at the corners.

Care should be taken in making proper selection of plants. Too often we see ugly plantings that have overgrown and covered the windows, thus shutting out light.

Evergreens are, perhaps, the best material to use because they give all-year effect. They fall into two classes: large-growing trees for bulky masses, and dwarf-growing for low masses. Use the dwarf ones under windows, etc., and keep the tall ones at corners or where height is desired. Evergreen shrubs incorporated with them make the best possible planting. If economy is the guiding factor, an effective planting can be made of flowering shrubs which may be obtained in both tall- and low-growing varieties.

Let us help you make a foundation planting that will be as harmonious and economical as possible.

ROCK-GARDEN SUGGESTIONS

WHY NOT have a Rock-Garden as a feature of your landscape? The pleasure derived from a Rock-Garden is now enjoyed by the owner of the medium- and small-sized property. Before going ahead in making one, considerable knowledge is necessary as to construction and selection of plants. Space prevents our going much into detail; we simply state a few helpful hints, and elsewhere in this booklet you will find recommended plants listed under Dwarf Evergreens, Evergreen Shrubs, and Perennials. For a background to the Rock-Garden, see lists of tall-growing evergreens and shrubs. There are many good books on the subject which you can easily procure, or our advice is free for the asking. It would be a real pleasure to help you design and make a Rock-Garden that would add interest to your landscape and be a joy to you.

There are two types of Rock-Gardens, the natural and artificial. In one the rocks are there; in the other, the rocks have to be placed. Look for flat ones. The hard, rounded boulders of Long Island may not be ideal rock-garden material, but they are here. Select a natural site, if possible. What do the rocks do? Keep out competition, offer a place for low plants to reach cool, moist soil under the rocks and a place to grow above the rocks. Are the rocks necessary for rock-plants? No, you can grow the many new or rare and beautiful plants in the open border. Stumps will do for rocks.

The Rock-Garden should be away from large trees because the dense shade, drippings, and feeding roots would injure the small plants. Picture an alpine scene and try to reproduce it in miniature. It should be along natural lines, avoiding straight lines and set arrangement. If possible, select moss-grown rocks that have a weather-beaten appearance. Place them more or less flat so the water will run into the soil, not off. In this position, the rocks protect the roots from heat and drought in summer, and frost in winter. Rocks and soil should be built together, step by step. The pockets should be large enough to allow ample space for the plant and roots to grow. Careful attention to watering should be given in summer, and necessary protection for the tender plants in winter. An annual top-dressing of soil is also necessary.

A well-planned Rock-Garden presents a good appearance throughout the year. Bulbs of low growth give early spring effect; alpines and small shrubs for spring and summer; evergreens for winter effect; after flowering plants have died down; and, of course, water- and bog-plants for the pool or stream.

You can come to Hicks Nurseries and take home plants at any time.
Rock-garden at the Hicks' homestead, showing what can be done in a small area. A bronze frog spouts for a tiny waterfall, terminating in a bog-bordered pool—an alpine scene in miniature.

A Hicks' foundation planting at residence of Mr. Robert Nehrbas, Garden City, L. I. The tall evergreens are Douglas Spruce and Hemlock. The low plants are Laurel, Rhododendrons, and Yew, with an edging of Pachysandra.
WHEN TO PLANT

YOU NEED not limit yourself to any particular season. Planting can be done, with equal safety, most any time of the year. Our guarantee, as printed on page 21, covers all seasons. The old idea of planting only in spring and fall is obsolete. The all-year planting service of Hicks Nurseries has proved a valuable service. It is a lot of fun to think out the convenience and beauty of your home-grounds and go ahead and do it, no matter what the season. The easiest, quickest, and cheapest way, in time and money, is often to come to the Hicks Nurseries, roam around until you see the trees or flowers that fit your mental pictures, pick them out, find foreman to have the plants dug, and take them home with you. If too big, arrange for quick delivery. Ask for estimate on delivery and planting.

Summer Planting

Hicks Nurseries has led the way in educating the profession and public to the many advantages of summer planting. Approximately 90 per cent of the trees and plants in our Nurseries can be safely transplanted all summer. You can select them in leaf and for particular color of bloom, when at their full height of beauty. You avoid the uncertainty of whether you will like the plant or not, as frequently occurs when selecting unfamiliar plants when dormant. The beauty of a large Maple, Linden, or Oak can be compared and selection made. In a day or two the tree is planted on your lawn (as illustrated on opposite page), so that you and the children receive immediate benefit of the shade. Perhaps a particular color-scheme in the garden is being planned. You can come to the Nursery when the perennials are in bloom, pick out the colors you desire, and take home in your car. Some are growing in pots; others in the field will be lifted with ball of earth and set in paper pots or boxes. All they require is a good drink of water after planting.

Another important advantage of summer planting is that the ground is warm and new root-growth starts immediately. Being moved with large balls of earth, cutting back is not so severe, and the present and next season’s growths are more normal than that of trees dug with bare roots during the dormant season.

The transplanting of trees and plants when in full leaf is not difficult with our methods. We transplant with large balls of earth, thin out the growth, and water. A great many (evergreen trees and broad-leaf evergreen shrubs, Beech, Larch, Sweet Gum, Tulip, and Oak trees) require being dug with balls of earth at all seasons, so there is no difference in the summer method of planting with them. A few evergreens have tender new growth during June and early July, and with them it is best to wait until late July, August, or September for transplanting. With watering before and after planting, they, too, can be planted any time during the summer.

Winter Planting

Winter planting, too, has its advantages, especially where large trees are concerned. By winter planting we mean planting when there is considerable frost in the ground. On Long Island there is usually not much frost before January 1. The men easily pick through a few inches of frost. Trees can be hauled without injury to lawns. The best method is to plan ahead and mulch the trees and planting locations before much frost gets in the ground. For keeping out the frost, we generally use salt-hay. To encourage winter planting we have occasionally offered to do such mulching free of charge. The advantage of moving trees during winter is that you keep men employed and get the work done before the spring rush, with possible delay. Winter is an ideal time for thinning out the crowded trees on many estates.

The result of winter planting is seen at the Belmont Park Race Track. A forest of Pines, Maples, Lindens, and Oaks was planted along the back stretch to screen out village and railroad. Other groups of large trees were planted elsewhere on the grounds. Practically all this planting was done during the winter months, to the mutual benefit of both parties—Belmont Park Race Track got an effective, economical planting and Hicks Nurseries kept men and trucks employed during the slack season. Plan now for next winter’s work.

LANDSCAPE ARCHITECTS

The professional landscape architect holds the same relation as the architect who designs your house, the engineer who designs a bridge or the electrical engineer who designs a power plant. Many do not know the difference between a professional landscape architect and a landscape gardener, who buys and sells plants and does grading and road-construction.

Summer planting aids your landscape architect to show you what is planned. It divides up your troubles, pleasure, and payments. It permits your men to plant and rearrange when they are not rushed with spring work. It permits the nurserymen to keep a highly skilled staff who have the time and interest to dig and plant your trees in the right way.
This shows a large Linden tree from our Nurseries being planted last summer, in full leaf, at residence in Garden City. Note the large ball with extending roots carefully wrapped. Such planting in summer is not an experiment; we have been doing it many years and guarantee successful results.
LANDSCAPE HINTS

This list is given as an aid in developing attractive home landscapes. A careful selection of plants is necessary if the best results are to be obtained. The plants are described in their respective places in Price List—see index.

Woody Plants in Order of Bloom
(Trees, Shrubs, and Vines)

MARCH-APRIL BLOOM

Cornus mas. Cornelian Cherry. Bright yellow.

MAY BLOOM

Amelanchier communis. Double-flowering Almond. Pink and white.
Aronia arbutifolia. Red Chokeberry. White.
Azalea calendula. Flame Azalea. Orange-red.
Crape myrtle in variety. Hawthorn. White, Pink, and Scarlet.
Halesia tetraptera. Silver Bell. White.
L. tatarica. Tatarian Honeysuckle. Pink and white.
Malus in variety. Floribunda. White, Pink and Red.

JUNE BLOOM

Azalea arborescens. Sweet Azalea. White.
Cotoneaster in variety. Cotoneaster. White and Pink.
Deutzia in variety. Deutzia. White and Pink.
Laburnum alpinum. Scotch Laburnum. Yellow.
Liriodendron tulipifera. Tulip Tree. Greenish yellow blotched with orange.
Lonicera japonica halliana. Hall’s Japanese Honeysuckle. White and yellow.
Phaedolepis in variety. The Mock Oranges. White.
Roses in varieties. Climbing and Bush Roses. Various shades.
Syringa emodi. Himalayan Lilac. Pink.
V. dentatum. Arrowwood. Red.

JULY BLOOM

Azalea viscosa. Swamp Azalea. White and pink tinted.
Eubia lupehensia. Yellowish white.
Lilac. White.
Memorial Rose. Hydrangea paniculata grandiflora. White.
Memorial Rose. Hydrangea paniculata grandiflora. Red, Pink, and White varieties.
Rhododendrons in variety. Numerous shades.
White.

AUGUST BLOOM

Hibiscus moscheutos. Marshmallow. White, Pink, and Red.
Lilac. White.

SEPTEMBER BLOOM

Hydrangea arborescens. Smooth Hydrangea. Pink.
Lilac. White.

OCTOBER BLOOM

BERRY-bearing Shrubs. See separate list.

DECEMBER BLOOM

BERRY-bearing Shrubs. See separate list.

JANUARY TO MARCH BLOOM

BERRY-bearing Shrubs. See separate list.

Hicks Nurseries, Westbury, N. Y.

Planting Suggestions
Trees and Shrubs with Attractive Fruits

Berry-bearing shrubs give interest and beauty to the winter landscape and help to feed the birds. 

Aronia arbutifolia. Red Chokeberry, Red berries. 
Cornus in variety. Dogwoods. Red, Blue, and White berries. 
Crateagus in variety. Hawthorns. Orange-red fruit. 
Eucalyptus alata. Winged Eucalyptus. Orange berries. 
Fles glabra. Inkberry. Black berries. 
Lonicer a tatarica. Tatarian Honeysuckle. Red berries. 
Malus. Flowering Crabapples. Yellow and red fruit. 
Prunus tomentosa. Shanking Cherry. Red fruit. 
Symphoricarpos racemosus. Snowberry. White berries. 
Viburnum cassinoides. Wild-rose. Pink and blue berries. 
V. lantana. Wayfaring Tree. Red fruit. 
V. opulus. European Cranberry. Red fruit. 

Vines with Attractive Fruit

Roses. Climbing Orange and red fruit.

Rock-Gardens

For information on how to make a Rock-Garden see page 6. 
For plant material see Dwarf Evergreens, pages 25 to 33; Evergreen Shrubs, pages 33 to 37; Azaleas and Rhododendrons, pages 39 to 41; Hardy Flowers (Perennials), pages 54 to 61.

Plants for Shady Places

Suggestive Hedge Plants

The most common purpose of a hedge is to mark a boundary. In this respect many plants qualify. Plants used as a hedge should be kept broad at the bottom and narrower at the top. This gives the lower branches more light and keeps them from dying out. Generally speaking, a hedge should be trimmed before growth starts in the spring, and again lightly in late summer or fall. 

Plants for Fall Coloring

Autumn color affords us opportunity to have a landscape as spectacular and gorgeous as at any other season. 

How to Prune Shrubs

Some people seem to prune their shrubs just for fun, else natural grace and beauty would not so often be sacrificed for inartistic globes and balloons. About the only legitimate reason we have discovered for pruning is to keep your shrubs from getting too large or too wide. The rule to follow is to cut out the oldest and largest branches at the ground. You will not lose any flowers if you prune after the plant has finished blooming. An exception to this rule is Hydrangea. Cut the branches back severely. The size of the flower-head is largely governed by the food and water you give the plant.

How to Plant

(1) Dig a hole wide and deep enough to receive roots without bending or breaking. 
(2) Bring in good soil if necessary. 
(3) Set tree or plant in hole at same depth it was previous to digging and pack each shoelful of earth between roots with heel or packing stick. 
(4) Water when hole is partly filled. Soil should be thoroughly saturated. 
(5) Leave a slight depression for watering in summer. Fill with soil for winter protection.

How to Care for a Tree

Hard ground is possibly the greatest hindrance to health. Loosen the soil as deep as a fork and wide as the branches so the little rootlets can reach out for food and moisture. Manure or compost can be dug in at the same time. When the soil is loose, water will disappear from the surface immediately and penetrate to the roots. When the surface is hard, the water will flow away before the soil near the tree can absorb it. 

Rain is deceiving. An all-night rain may saturate the soil but 3 inches deep. The roots of a tree are 6 to 18 inches below the surface. It is easy to understand then how tantalizing rain can be to a tree. It's almost safe to disregard the rainfall altogether. The quick way to find out is to test the soil with a fork, and a basin made to hold the water. It may be necessary to fill the basin two or three times.
TREE-MOVING DEPARTMENT

The most attractive homes, without exception, are those made cozy and hospitable by large trees. Large trees are bounteous things; they are friendly things; there is comfort in their shade; there is beauty in their symmetry; they stand guard against wind and storm; they make an enviable environment. The city with all its architectural beauty can still look with jealous eye on the simple little home quietly nesting among its large trees. The landscape of a small or large estate is incomplete without the use of large trees. They give elevation against the sky and broad shadows on the lawn; frame beautiful vistas and shut out undesirable views.

What are your needs? Are there trees on your place to transplant, or procurable trees in the near-by vicinity that you need to give that touch of mature beauty? Have you trees that are crowding? Usually people wait too long to thin out. Trees are not killed by waiting, but they lose part of their symmetry. We can advise you which are most likely to make permanently beautiful trees, which to cut out, which to move now, and which to move later.

The transplanting of large trees has reached a very high development at the Hicks Nurseries. Machines have been invented, tested, discarded or improved for the past sixty years. There has developed a fund of accurate information as to the results with various species and individual trees when moved in different ways. This store of knowledge is yours for the asking.

Transplanting is a surgical operation and, therefore, on an important tree it should be done with the greatest skill, with the most improved apparatus, and receive the best care. For important citizens, the most skilled surgeons are consulted.

Of greatest importance to the success of Hicks large tree-moving is the fact that all our tree-moving foremen have been with us a great many years. The high development of our tree-moving operations is due to their faithful efforts. Many of the helpers, too, are old hands. These experienced crews are available at any time. We send out full crews, or we send out a foreman with two or three experienced men to work with local labor, thereby co-operating all we can to keep the cost down. Our operations extend from Massachusetts to Virginia and westward. For these distant jobs, it is best to have several trees moved, so as to distribute the expense of transportation of men and apparatus.

Large trees may be supplied in two ways: We can ship from our Nurseries trees up to 30 feet high and 15-foot spread of branches. We can look up large trees within 10 to 15 miles of where they are wanted, and make a report, with photographs of the trees available. Persons wanting trees can look them up and have us inspect them and decide if they are suitable and economical. Many make the mistake of selecting poor trees because they are near-by. They do not know how to select the best trees. The age and physical condition of the tree is important. A tree which is growing thriftily is better than an old, stunted tree of the same size. This is determined by the annual growth. It is better to go 10 miles and get the best possible trees, as distance adds but little to the total expense. The principal expense is skillful digging, transporting, and planting.

You ask what size is practicable to move? Shade trees up to 60 feet high and 30 feet spread, because they can be tied in to go through most roads, under wires and bridges. Larger trees can be transplanted on your place where such obstacles do not hinder the operation. Large Evergreens are also successfully transplanted. The success of Hicks large tree-moving is based upon honesty and practicability. If there is a possibility of the tree being greatly damaged in transit, or failure due to poor root system or unsuitable location, you are advised to that effect. It is no rich man's gamble, but 99 per cent success with Hicks' methods of moving.

To arrange for moving it is best that we investigate the situation, route, and trees. A charge is made if it takes much time or transportation expense. Large trees, not from the nursery, are not guaranteed. If you entrust the work to our trained men, success is practically certain.

Most large trees can be moved any time of the year. Fall and winter months are ideal because you avoid the rush and possible delay of spring planting. August and September is a good time to move Evergreen Trees; the new growth has hardened and they will go right ahead making new root-growth.

Get in touch with our office for further information and rates. Remember, our tree-moving operations are not limited to Long Island. Our apparatus and skilled staff can be sent to almost any part of the country.
Large Beech ready to be loaded on mover for transporting to estate of Mr. Percy Pyne, Roslyn, L. I. Another case where large trees were needed on terrace to frame house and give mature beauty. This picture illustrates how skillfully this tree was prepared for moving and evident insurance of success. We might add, two such trees were moved by Hicks Nurseries, and are doing fine.

Large Linden being moved to estate of Mr. Marshall Field, Huntington, L. I. Two such trees were successfully transplanted. Note the Hicks' way of digging with large balls of earth and saving all extending roots by carefully wrapping, to prevent drying out.
SALES DEPARTMENT

Hicks Nurseries, Westbury, N. Y.

Sales Department

THIS is the Department Store of Hicks Nurseries with which every homeowner on Long Island should become acquainted. It is of inestimable value and convenience for those who want to call at the Nursery to see quickly, compare, and select plants for taking home in their car. The advantage of this Department is evident when you consider that our Nurseries cover about 250 acres with several million plants. Freshly dug plants are taken from the various blocks and put on display in the Sales Department, thereby saving you the time of covering such a large area.

On the opposite page are two views of the Sales Department. The large building is only a short distance from the main entrance leading in from Jericho Turnpike. Drive in; park your car. You are welcome whether you come to buy or just to see. You will be surprised to find plants of good quality at very reasonable prices. Better yet, every plant is guaranteed to grow satisfactorily. Should any fail, come back and get replace plants absolutely free of charge. Many people have developed their home landscape by making weekly visits to this Department. There is no delay—salesmen are on hand to advise and help in making a selection. The plants are carefully packed and placed in your car. There is plenty of paper and boxes on hand so that no harm can be done to the car. Upon request, our trucks will make delivery at a slight additional cost.

The Sales Department has an interesting display of plants at all seasons. In May and June, Azaleas and Rhododendrons create a riot of color, appearing as if touched by a fairy’s wand. June and July give a wonderful show of Roses with their unsurpassed beauty and fragrance. In early summer, German Irises and Peonies are on display. Japanese Irises and Phlox come next, followed by Asters in the fall. Evergreens are on display at all seasons. You realize their importance more during the winter months when other plants are defoliated.

In selecting plants you are not limited to the Sales Department. You can make a selection from any of the large blocks of trees and plants. A representative will gladly act as guide and adviser, or you can drive around yourself and pick out the plants and then get a salesman to give prices and arrange for delivery. You can have lots of fun picking out your own shade trees and other plants.

Particularly welcome are those of modest means who desire to develop their grounds at small expense. Plants of very good quality can be obtained from 25 cents up. Simply state your planting needs and we will show you how to get the most value for the amount you care to spend.

SHIPPING DEPARTMENT

YOU can enjoy the benefit of Hicks’ trees and plants whether you live a thousand miles away or in local territory. The high reputation of our stock is based upon over 75 years’ experience of knowing how to grow plants in quantity so that they can be economically planted on your grounds.

Our knowledge and system of growing produces a quality of stock remarkably superior in root-formation, thriftiness, and hardiness. Hicks Nurseries are inspected annually by the State Entomologist, and a certificate pronouncing the stock free from all insects designated as dangerous pests, and apparently healthy in every respect, will be attached to every shipment.

As additional insurance against failure, we refer you to our guarantee which is printed on page 21 of this booklet. This guarantee has been in effect for many years, and you can rely upon its being executed. Should a necessary adjustment occur, you will always find us willing to go more than half way.

In making up your planting-list, keep in mind that plants are living things and particular as to soil and climate. Study the trees and plants in your locality and avoid those that do not grow successfully. As a safeguard, we will carefully check up on your order and eliminate those not suited.

We specialize in Parcel Post, Express, Freight, Barge-load, and Carload Shipments. Distance is no hindrance. Many home-owners and landscape architects have enjoyed the benefit of Hicks’ carload shipments to their entire satisfaction. We have shipped as many as twenty to forty carloads in a season. Our methods of digging and packing insure the safe arrival of the plants. Freight shipments may be two, even three weeks en route, yet arrive in good condition, due to our expert packing. Express transportation is quicker but the rate is much higher. Please state how you wish plants sent. In the absence of explicit directions for mode of shipping, we will forward consignments according to our best judgment. A charge is made for packing for shipment if considerable labor and materials are used. On small shipments, such as sent by Parcel Post, no packing charge is made.

We are pleased to answer inquiries concerning what to plant, how to plant, and when to plant. Our experience is at your command. We will gladly submit planting-plan and estimate of material needed.
An economical way to develop your place is to make frequent visits to our Sales Department. The snapshot shows customers selecting plants which were freshly dug the day before. See how easy it is to make a selection quickly, and have them carefully loaded in your car to take home. Every plant is guaranteed to grow satisfactorily. Salesmen are always on hand to give planting advice and help you to make proper selection.

The long Sales Department building is plainly seen from the Jericho Turnpike, about 100 yards in from main entrance. Drive in. Park your car in large parking-space shown just in front of building. Spread before you is a large collection of plants assembled from the different departments, making it easy to study, compare, and select.

Distance is no hindrance. You can enjoy the benefits of Hicks trees and plants no matter where you live. Tell us your needs and we will help you select the right plants for your soil and location. Carload shipments are safe and economical, and can be quickly arranged. They are guaranteed to arrive in first-class condition. Full planting instructions will be given or, if you desire, arrangement can be made for our planting foreman to go and superintend the unloading and the planting.
DECIDUOUS TREES

The term deciduous is applied to trees the leaves of which fall in autumn. Laymen generally classify them as Ornamental Shade Trees.

No home, no matter how small, need be without the joy and comfort of abundant shade. And the well-informed bring shade to where they want it. Trees are a real part of a home—the cheapest part, and frequently neglected.

In selecting trees, the first question is, What is the purpose the trees are to serve—shade for the house, path or avenue; lawn-planting as single specimens or in groups; screens for undesirable objects, etc.? Whatever the purpose, you can select trees at Hicks Nurseries that are guaranteed to prove satisfactory.

For many situations it is best to plant large, time-saving trees that give immediate effect and shade. You cannot afford to wait half a lifetime to enjoy the benefits of a tree.

Come to Hicks Nurseries and have the fun of selecting your own trees. Planting can be done any time of the year.

ACER JAPONICUM PARSONSI. Fernleaf Japanese Maple. Shrub or small tree with beautiful bright green foliage. Large, divided leaves. This species and A. palmatum are known as Japanese Maples. Each 10

- 2 to 3 ft. high $4 00 $35 00
- 4 to 5 ft. high $14 00 $125 00
- 5 to 6 ft. high $18 00 $175 00

A. PALMATUM ATROPURPUREUM. Japanese Maple. Dwarf tree with purple-red leaves all summer. Each 10

- 1 to 1½ ft. high $4 00 $35 00
- 1½ to 2½ ft. high $8 00 $75 00

- 1 to 1½ ft. high $4 00 $35 00
- 1½ to 2½ ft. high $8 00 $75 00

- 6 to 8 ft. high $2 00 $17 50
- 8 to 10 ft. high $4 00 $35 00
- 10 to 12 ft. high, 2 to 3½-in. diam. $7 00 $65 00
- 12 to 14 ft. high, 3-in. diam. $15 00 $125 00
- 14 to 18 ft. high, 5 to 6-in. diam. $30 00
- 20 to 24 ft. high, 8 to 10-in. diam. $100 00

A. RUBRUM. Red Maple. Broad, oak-like tree. Brilliant autumn foliage. Will thrive either in damp soil or good soil on the uplands. Each 10

- 2 to 4 ft. high $5 00 $45 00
- 4 to 5 ft. high $10 00 $90 00
- 5 to 6 ft. high, 3½ to 4-in. diam. $15 00 $125 00
- 6 to 7 ft. high, 4 to 5-in. diam. $20 00 $175 00

A. SACCHARUM. Sugar Maple. Tall, ovate tree. Likes heavy soil. Good fall color. Each 10

- 2 to 3 ft. high $5 00 $45 00
- 3 to 4 ft. high, 2½ to 3-in. diam. $10 00 $90 00
- 4 to 5 ft. high, 3½ to 4-in. diam. $15 00 $125 00
- 5 to 6 ft. high, 4 to 5-in. diam. $20 00 $175 00

AMYGDALUS (PRUNUS) PERSICA ATROPURPUREA. Bloodleaf Peach. Valuable for purplish foliage effect. Each 10

- 5 to 7 ft. high $4 00 $35 00

BETULA ALBA LACINIATA. Cutleaf Weeping Birch. Tall tree with gracefully pendulous branches and deeply cut foliage. Each 10

- 10 to 12 ft. high $7 50 $70 00

CARPINUS BETULUS. European Hornbeam. Closely related to the beech. Ideal for hedges, screens, or for formal planting. Large, broad tree with mass of leaves. Each 10

- 4 to 5 ft. high $4 00 $35 00
- 5 to 6 ft. high $7 00 $65 00
- 6 to 7 ft. high $10 00 $90 00

- 1½ to 2 ft. high $4 00 $35 00
- 2 to 3 ft. high $14 00 $125 00
- 3 to 4 ft. high $20 00 $175 00

CERCIS CANADENSIS. American Redbud. A small tree with a wealth of floral beauty. Its twigs are covered with magenta-pink, pea-shaped blossoms before the foliage in May. Each 10

- 1½ to 2 ft. high $5 00 $45 00
- 2 to 3 ft. high $7 50 $65 00
- 3 to 4 ft. high $12 00 $100 00

C. CHINENSIS. Chinese Redbud. Similar to preceding variety except more dwarf, with crowded rose-pink blossoms in early May. Each 10

- 1½ to 2 ft. high $10 00 $90 00

CHIONANTHUS VIRGINICA. White Fringe. It makes a large shrub or small tree 15 feet high and blooms in June. The white "fringe" looks like delicate white lace hung all through the branches. Its leaves distinguish it from all other shrubs, being 3 inches broad and 8 inches long. Each 10

- 1½ to 2 ft. high $6 00 $50 00

CLADASTIS LUTEA. Yellow-wood. The few people who know this tree greatly admire it. It combines the gracefulness of the elm, the smooth, gray bark of the beech, and, in June, the long, white, pea-shaped flower-racemes of the wisteria. Each 10

- 1 to 2 ft. high $18 00
Residence of Mr. William D. N. Perine, Mill Neck, L. I. Hicks' large trees were used to frame house and enclose entrance court, which were tied together with an under-planting of Laurel, etc.

Residence of Mr. L. H. Shearman, Manhasset, L. I. This very pleasing landscape is ornamented with numerous large trees which cast broad shadows over the lawn. The tree in the foreground is a Pin Oak.
CORNUS FLORIDA. White-flowering Dogwood. Many know the Dogwood, and have seen the sign, "Spare the Dogwood. It takes years for a branch to grow." In early May, before the leaves appear, it illuminates the woodland with white blossoms, floating like butterflies through the darker parts of the forest, or on the edges massed in horizontal strata, white as snow or tinged with pink. In September its brilliant red berries feed the robins on their southbound journey. A week or two later the foliage turns red or scarlet with the first sumac and woodbine. In landscape planting it is properly used as a specimen tree, mass planting with shrubs, or bordering evergreen groups and woodland.

Hicks Nurseries, Westbury, N. Y.

EVODIA HUPEHENSIS. From China. One of the small-growing, flowering trees introduced from northern China. Belongs to the Toothache Tree family. It has panicles of yellowish white flowers in midsummer.

CRATAEGUS ODUM. Red-flowering Dogwood. Like preceding except flowers are red.

CRATAEGUS OXYACANTHA SPLENDENS. Paul's

EVODIA HUPEHENSIS. From China. One of the small-growing, flowering trees introduced from northern China. Belongs to the Toothache Tree family. It has panicles of yellowish white flowers in midsummer.

CRATAEGUS OXYACANTHA SPLENDENS. Paul's

CRATAEGUS OXYACANTHA SPLENDENS. Paul's

CRATAEGUS OXYACANTHA SPLENDENS. Paul's

FAGUS AMERICANA. American Beech. Forms a tall, silvery trunk in the forest, or a broad old tree of great character. Use for lawn, avenue, or screen-planting.

GINKGO BILoba. Maidenhair Tree. Leaves fan-shaped, with parallel veins, like the maidenhair fern. Resists smoke, therefore good for city-planting.

HALESIA TETRAPTERA. Silver Bell. A beautiful little tree having the branches thickly hung with snowy white bells in early May. Scatter them in your shrubbery or through open woods with dogwood.

HALESIA TETRAPTERA. Silver Bell. A beautiful little tree having the branches thickly hung with snowy white bells in early May. Scatter them in your shrubbery or through open woods with dogwood.
Sugar Maple
Silver Linden
Pin Oak

A Beech tree dug and ready for canvas cover to be laced on, then tipped and tied on platform for moving. Hicks' methods of growing produce fibrous root-systems which insure success in transplanting. There is a difference in trees, even where the height and diameter appear similar. The big difference is in the root-systems which you cannot see.

LIRIODENDRON TULIPIFERA. Tulip Tree. Always straight, clean, and symmetrical. Attains great size. Flowers appear in June and resemble large yellow tulips, shaded with green. Dug with ball like evergreens. Each 10

M. GLAUCA. Sweetbay Magnolia. Handsome small tree bearing sweet-scented flowers 2 to 3 inches across. Glaucous leaves. Each 10

M. KOBUS. Kobus Magnolia. Native of Japan. Flowers pure white, 4 to 5 inches across, appearing before the leaves. Each 10

M. SOULANGEANA. Of all flowering trees, the Magnolias take the lead. This variety is in greatest demand, having cup-shaped blossoms, touched with pink. Each 10

M. STELLATA. Star Magnolia. Native of Japan. Shrubby habit. Fragrant, semi-double white flowers appearing before the leaves. Each 10

M. TRIPETALAA. Umbrella Magnolia. Flowers 8 inches long, in June, after the heavy, tropical foliage appears. Attractive, large carmine fruits 5 inches long, 2 inches diameter. Each 10

M. TRIPETALAA. Umbrella Magnolia. Flowers 8 inches long, in June, after the heavy, tropical foliage appears. Attractive, large carmine fruits 5 inches long, 2 inches diameter. Each 10

MALUS, Flowering Crab-Apple. It is hard to imagine anything more dainty and beautiful than a collection of Flowering Apples, with their white, pink, or red blossoms. They give a happy note to the garden or shrubbery or woodland about the middle of May. The little cherry-like, red and golden fruits feed the birds all winter.
The result of Hicks' large tree-moving on the Nicholas Brady estate, Roslyn, L. I. These large Elms, and numerous other large trees, were planted for shade and quick mature effect. Originally the location was a bare hilltop. You can enjoy the benefits of Hicks' tree-moving. Let us help you in developing your landscape.
QUERCUS • Oaks

The Oaks represent the sturdiest character of our tree family—long-lived trees that defy ocean blast and prairie wind. There is an Oak for every soil-condition. The thought that they are slow-growing is erroneous; when established they grow just as fast as the maple or linden. The name describes the Scarlet Oak, and the noblest trees left along property lines and roadsides are Oaks. Oak-plantations are enduring monuments. They are beautiful in form and autumn coloring of foliage. Some hold their leaves all winter.

QUERCUS BICOLOR. Swamp White Oak. Tree similar to White Oak, but quicker. Native on hard-pan or clay soil of Long Island. Each

These make beautiful lawn trees. The beauty of apple-blossoms is unsurpassed, and the tree itself has a pleasing character befitting to garden and landscape. Ask for sizes and prices.
Dogwood ornamenting drive on estate of Mrs. Leonard Elmhurst, Wheatley Hills, L. I. The most showy of the native trees, with healthy foliage and fall coloring.

Flowering Cherries in garden of Mr. J. S. Phipps, Westbury, L. I. The weeping form at the right is a tumbling mass of little pink bells which seem to float in the air.
EVERGREENS of all kinds give a feeling of richness to the home landscape, especially during the winter months when other trees and shrubs are defoliated. Hicks Nurseries has given much time and study to the growing of evergreens. Our largest department is devoted to them.

ABIES - Fir

Pyramidal trees, with whorled, spreading branches. The species of this genus are among the handsomest and stateliest conifers. With them you will find new elements for composing your landscapes.

ABIES CEPHALONICA. Greek Fir. Foliage dark, shining green, pale beneath. Recommended as lawn specimen or to dignify the background of an evergreen garden. Each 10 to 12 ft. high $6.00 $5.50
1 to 1 1/2 ft. high $4.00 $3.50
2 to 3 ft. high $6.00 $5.50
3 to 4 ft. high $8.00 $7.50

A. CONCOLOR. White Fir. It has a beautiful silver or blue-green color, contrasting well with the darker evergreens, and is therefore a good substitute for blue spruce. A big, broad-shouldered, sturdy tree well suited for your landscape. Each 10 to 12 ft. high $8.00 $7.50
1 to 1 1/2 ft. high $3.00 $2.50
2 to 3 ft. high $4.00 $3.50
3 to 4 ft. high $6.00 $5.50
4 to 5 ft. high $8.00 $7.50
5 to 6 ft. high $10.00 $9.50
6 to 8 ft. high $15.00
7 to 10 ft. high $25.00
8 to 12 ft. high $40.00
Larger sizes Prices on application

A. HOMOLEPIUS (BRACHYPHYLLA). Nikko Fir. From the Nikko Mountains in Japan. Likes our climate better than its own relative, the Balsam Fir. A rapid-growing evergreen with dark green foliage and space between the branches. Beautiful tree. Each 10 to 12 ft. high $8.00 $7.50
1 to 2 ft. high $3.00 $2.50
2 to 3 ft. high $4.00 $3.50
3 to 4 ft. high $6.00 $5.50
4 to 5 ft. high $8.00 $7.50
5 to 6 ft. high $10.00 $9.50
6 to 8 ft. high $15.00
7 to 10 ft. high $25.00
8 to 12 ft. high $40.00
Larger sizes Prices on application

A. NORDMANNIANA. Nordmann Fir. One of the most desirable Firs in cultivation. It has rich, dark, velvety green foliage. Each 10 to 12 ft. high $15.00 $14.00
1 to 1 1/2 ft. high $3.00 $2.50

A. VEITCHI. Veitch’s Fir. A graceful, rapid-growing Fir of slender habit. The under side of the shiny green foliage is marked with two broad bands of white, giving a distinctly blue effect. Each 10 to 12 ft. high $8.00 $7.50
2 to 3 ft. high $5.00 $4.50
3 to 4 ft. high $6.00 $5.50
4 to 5 ft. high $10.00 $9.50

CEDRUS ATLANTICA. Mount Atlas Cedar. One of the most distinctive and ornamental evergreens. The Mountain Atlas and Deodar Cedars are true Cedars, the native Red Cedar being correctly speaking, a Juniper. The Mountain Atlas Cedar and Cedar of Lebanon grow together in Palestine. They are almost identical. Deodar Cedar comes from the northwestern Himalaya Mountains. Each 10 to 12 ft. high $8.00 $7.50
3 to 4 ft. high $7.00

C. DEODARA. Deodar Cedar. Tree of pyramidal habit. Light bluish green needles. Each 10 to 12 ft. high $8.00 $7.50
2 1/2 to 3 ft. high $5.00

CHAMAECYPARIS (Retinospora) - Japanese Cypress

These have become more widely planted than any other evergreen from Asia. The great variety of form and color—dark green, light green, golden yellow, and silvery blue—lend variety to otherwise monotonous landscapes. Excellent for hedge planting as they can be kept sheared to desired width and height.

CHAMAECYPARIS OBUSA. Hinoi Cypress. Shell-like fronds of dark green foliage. Grows to a tall tree in Japan, but use it where you want a plant about 6 feet high. Each 10 to 12 in. high $8.00 $7.50
1 to 2 ft. high $2.00 $1.50
1 1/2 to 2 ft. high $2.50 $2.00
2 to 3 ft. high $5.00 $4.50
3 to 4 ft. high $6.00 $5.50

C. OBUSA AUREA. Golden Hinoi Cypress. Golden form of preceding variety. Each 10 to 12 in. high $8.00 $7.50
1 to 2 ft. high $2.00 $1.50
1 1/2 to 2 ft. high $2.50 $2.00
2 to 3 ft. high $5.00 $4.50
3 to 4 ft. high $6.00 $5.50

C. OBUSA COMPACTA. Football Cypress. Semi-dwarf, compact, and bushy. Dark green, wavy foliage. Very handsome. Each 10 to 12 in. high $12.00 $11.00
1 to 2 ft. high $6.00 $5.50
1 1/2 to 2 ft. high $6.00 $5.50
2 to 3 ft. high $12.00 $11.00
3 to 4 ft. high $15.00 $14.50

C. OBUSA GRACILIS. Slender Hinoi Cypress. Compact, pyramidal form, with dark green foliage. Branchlets with slightly pendulous tips. Each 10 to 12 in. high $6.00 $5.50
1 to 2 ft. high $5.00 $4.50
1 1/2 to 2 ft. high $5.00 $4.50
2 to 3 ft. high $10.00 $9.50
3 to 4 ft. high $15.00 $14.50

C. OBUSA MAGNIFICA. A vigorous form having deep green foliage with many shadows. Each 10 to 12 in. high $12.00 $11.00
1 to 2 ft. high $6.00 $5.50
2 to 3 ft. high $6.00 $5.50
3 to 4 ft. high $12.00 $11.00
4 to 5 ft. high $18.00 $17.50

C. OBUSA NANA. Dwarf Hinoi Cypress. Dwarf and compact, with deep shadows; dark green, crested fronds. For foundations and rockeries. Each 10 to 12 in. high $8.00 $7.50
6 to 12 in. high $6.00 $5.50

C. OBUSA NANA AUREA. Golden form of above. A rare, dwarf evergreen especially useful for rock gardens. See other dwarf evergreens for same purpose. Each 10 to 12 in. high $15.00 $14.50
1 to 1 1/2 ft. high $8.00 $7.50
2 to 3 ft. high $10.00 $9.50
3 to 4 ft. high $12.00 $11.00

[24]
Who said the landscape is uninteresting in winter? If you had only Pines and Birches it would be interesting. With all the evergreens, bright-berried shrubs, and brilliant barks, as Holly, Laurel, Rhododendrons, etc., it abounds with beauty. The illustration shows one of the picturesque drives on the estate of Mr. J. S. Phipps, Westbury, L. I. White Pines are featured with berried and brilliant-barked shrubs bordering the drive.
CHAMAECYPARIS PISIFERA. Sawara Retinospora.  
Velvety, bright green pyramid. Foliage borne on somewhat pendulous branches.  
Each 10
1 to 2 ft. high .......................... $2.00  $17.70
2 to 3 ft. high ... 3.00 27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 8 ft. high ... 10.00 90.00

C. PISIFERA AUREA. Golden Sawara Retinospora.  
Golden form of the preceding. Each 10
1 to 2 ft. high .......................... $2.00  $17.70
2 to 3 ft. high ... 3.00 27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 8 ft. high ... 10.00 90.00

C. PISIFERA FILIFERA. Thread Retinospora. Weeping form with thread-like branches. Each 10
1 1/2 to 2 ft. high ......................... $3.00  $27.70
2 to 3 ft. high ... 3.00 27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 8 ft. high ... 10.00 90.00

C. PISIFERA FILIFERA AUREA. Golden-Thread Cypress. Golden form of preceding variety. Each 10
1 1/2 to 2 ft. high ......................... $2.10  $17.70
2 to 3 ft. high ... 3.00 27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 8 ft. high ... 10.00 90.00

C. PISIFERA PLUMOSA. Plume Retinospora. Feathery green foliage; broad, symmetrical, and dense. Can keep sheared so as not to cover windows. Each 10
2 to 3 ft. high .......................... $2.10  $22.70
3 to 4 ft. high ... 3.00 27.70
4 to 5 ft. high ... 4.00 35.00
5 to 6 ft. high ... 6.00 55.00
6 to 7 ft. high ... 8.00 70.00
7 to 8 ft. high ... 10.00 90.00

C. PISIFERA PLUMOSA AUREA. Golden Plume Retinospora. Golden form of above. Each 10
1 to 2 ft. high .......................... $2.00  $17.70
2 to 3 ft. high ... 3.00 27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 8 ft. high ... 10.00 90.00

C. PISIFERA PLUMOSA NANA. Dwarf Plume Cypress. Small, velvety green domes for rockery. Each 10
6 to 12 in. high ........................ $2.00  $17.70
1 to 1 1/2 ft. high ......................... 3.00 27.70

C. PISIFERA SQUARROSA. Mass Retinospora. Cloudy blue foliage. With sparkling dew upon its silvery foliage, you may decide that it is the prettiest evergreen for summer. Each 10
2 to 3 ft. high .......................... $3.00  $27.70
3 to 4 ft. high ... 4.00 35.00
4 to 5 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00
6 to 7 ft. high ... 10.00 90.00

C. PISIFERA SQUARROSA NANA. Dwarf Mass Cypress. Cloudy blue domes. Each 10
1 to 1 1/2 ft. high ......................... $2.00  $17.70

C. PISIFERA SULPHUREA. Sulphur Mass Cypress. Has light yellow tips. Each 10
1 to 1 1/2 ft. high ......................... $2.00  $17.70

JUNIPERUS • Juniper

JUNIPERUS CHINENSIS COLUMNARIS. Column Chinese Juniper. A very hardy Chinese Juniper. It forms a distinct, narrow pyramid with needle-like leaves. The green or blue-green foliage is very decorative. Each 10
1 1/2 to 2 ft. high ........................ $2.50  $27.50
2 to 3 ft. high ... 4.00 35.00
3 to 4 ft. high ... 6.00 55.00
5 to 6 ft. high ... 8.00 70.00

J. CHINENSIS OBLONGA. Forms a broad, irregular pyramid. Grayish foliage. Each 10
1 to 2 ft. high .......................... $4.00  $37.50
2 to 3 ft. high ... 5.00 45.00
4 to 5 ft. high ... 6.00 55.00

J. CHINENSIS PFTZERIANA. Pfitzer's Juniper. Ostrich plumes of gray-green, with a lateral growth. Most popular low, spreading evergreen for foundation, rockery, and garden planting. Each 10
1 to 1 1/2-ft. spread ...................... $2.50  $27.50
1 1/2 to 2-ft. spread .................... 3.00 37.50
2 to 3-ft. spread .... 4.00 45.00
3 to 4-ft. spread .... 7.50 70.00
4 to 5-ft. spread .... 10.00 90.00
5 to 6-ft. spread .... 15.00 125.00

J. CHINENSIS PROCUMBENS VARIEGATA. A low, spreading shrub with foliage tinged with yellow. For rockery and carpeting the ground. Each 10
1 to 1 1/2-ft. spread ...................... $3.00  $27.50

J. CHINENSIS SARGENTI. A prostrate shrub with creeping stems forming dense mats. Valuable as a ground-cover and for the rockery. Each 10
1 1/2 to 2-ft. spread .................... $3.50  $37.50
3 to 4-ft. spread .... 5.00 45.00

J. COMMUNIS DEPRESSA. A lower form of the Common Juniper for dry banks and rockery. Each 10
1 to 1 1/2-ft. spread ...................... $1.50  $12.50
2 to 3-ft. spread .... 2.00 22.50

J. COMMUNIS DEPRESSA PLUMOSA. Low form for rocky nooks and slopes. Purple-bronze in winter. Each 10
1 to 1 1/2-ft. spread ...................... $2.00  $17.50
1 1/2 to 2-ft. spread .................... 3.00 37.50
3 to 4-ft. spread .... 4.00 50.00
4 to 5-ft. spread .... 6.00 70.00
5 to 6-ft. spread .... 8.00 90.00

CRYPTOMERIA

CRYPTOMERIA JAPONICA LOBBI. Lobb Cryptomeria. A Japanese pyramidal evergreen of compact habit and dark green foliage. It is very distinct from other evergreens. Each 10
2 to 3 ft. high .......................... $5.00  $45.00
3 to 4 ft. high ... 8.00 70.00
5 to 6 ft. high ... 12.00 100.00
6 to 8 ft. high ... 18.00 150.00

Hicks Nurseries, Westbury, N. Y.

Evergreen Trees
Tall, spiry Red Cedars (Juniperus communis hibernica). Irish Juniper. This will make a narrow spire, 7 feet high and 10 inches in diameter, of bluish green foliage. Exclamation points for the rockery and garden. Each 10
1 to 1½ ft. high $2.00 $17.50
2 to 3 ft. high 3.00 27.50
3 to 4 ft. high 4.00 37.50
5 to 6 ft. high 5.00 47.50
6 ft. high 6.00 57.50

J. COMMUNIS PYRAMIDALIS. An upright form of Common Juniper. Each 10
1½ to 2 ft. high $2.00 $17.50
2 to 3 ft. high 3.00 27.50
3 to 4 ft. high 4.00 37.50
4 to 5 ft. high 5.00 47.50

J. EXCELSA STRICTA. Spiny Greek Juniper. An upright-growing cone with cheerful blue-green foliage. Each 10
3 to 4 ft. high $4.00 $35.00
4 to 5 ft. high 5.00 45.00
5 to 6 ft. high 6.00 55.00

J. VIRGINIANA GLAUCA. Blue form of the above. Each 10
2 to 3 ft. high $3.00 $27.50
3 to 4 ft. high 4.00 35.00
4 to 5 ft. high 5.00 45.00
5 to 6 ft. high 6.00 55.00

J. VIRGINIANA SCHOTTI. Schott Red Cedar. Columnar tree with compact, bright green, scale-like foliage. Each 10
1 to 3 ft. high $3.00 $27.50
2 to 3½ ft. high 4.00 35.00

PICEA • Spruce

The spire-like crowns of Spruces lend a peculiar charm in garden and landscape. They thrive in well-drained soils, freely exposed to sun and air.

PICEA ENGELMANNI. Engelmann Spruce. Native of Colorado. Blue-green; soft, beautiful. Each 10
2 ft. high $4.00 $37.50
P. EXCELSA. Norway Spruce. A common variety of graceful and rapid growth, for sheltered situations. Each 10
1 to 1½ ft. high $1.00 $12.50
2 to 3 ft. high 2.00 22.50
3 to 4 ft. high 3.00 27.50
4 to 5 ft. high 4.00 32.50
5 to 6 ft. high 5.00 37.50

P. EXCELSA NANA. Globose or sometimes conical form with crowded short branches. Ideal for rockery. Each 10
1 to 1½ ft. high $3.00 $27.50
P. EXCELSA PUMILA. A dwarf, globose, densely branched form with dark green foliage. Each 10
1 ft. high $5.00 $45.00
P. EXCELSA PYGMAEA. Pygmy Norway Spruce. A very dense, small, conical form of dark green. Each 10
1 ft. high $5.00 $45.00
P. KOYAMALI. Japanese Spruce. Narrow-pyramidal Spruce with small needles. Introduced from Japan and Korea by the late E. H. Wilson of the Arnold Arboretum. Each 10
3 to 4 ft. high $8.00 $65.00
4 to 5 ft. high 9.00 70.00
5 to 6 ft. high 10.00 75.00

P. OMORIKA. Siberian Spruce. Tall, narrow tree. Understory of foliage is blue, giving distinctive appearance. Each
5 to 6 ft. high $15.00
6 to 7 ft. high 20.00

1 to 1½ ft. high $3.00 $27.50
1½ to 2 ft. high 4.00 35.00
2 to 3 ft. high 5.00 45.00
3 to 4 ft. high 6.00 55.00
5 to 6 ft. high 7.00 65.00
6 to 7 ft. high 8.00 75.00

Prices on application.

Hicks Nurseries, WESTURY, N. Y.
Japanese Cypress. Many such blocks of low-priced evergreens from which to choose.

Spreading form of Japanese Yew.

Hick's Yew (Taxus media Hick's). It has the pleasing upright character of the Irish Yew, plus the important point of entire hardiness.

Block of Pfitzer's Junipers with spread of three to five feet.

Red Pine. Fast-growing tree with long, dark green needles; will stand dry, sandy soils.

Dwarf Arborvitae. The several varieties of Dwarf Arborvitae are suitable for foundation, garden, and tub planting.

Douglas Spruce. One of the best evergreens for general planting. Use it where you need a tall, narrow tree.
PICEA PUNGENS GLAUCA. Blue Colorado Spruce. A conspicuous tree with bluish or sage-green foliage. Each 10

P. RESINOSA. Red Pine. One of the handsomest Pines. It is named from its reddish bark. Has form and texture like Austrian Pine. Pure dark green in color. In a collection of Pines it will stand out as the darkest tree. Red Pine grows faster than White Pine and keeps its central leader. If you have a dry hillsides you wish clothed, these will serve you admirably. Each 10

P. STROBUS. White Pine. Classed as the noblest evergreen in the northeastern United States. It will give you more ways of expressing yourself than any other evergreen. Youthful beauty is succeeded by the beauty of middle age and picturesque old age. The Colonists found White Pine native in many parts of Long Island. It was the easiest timber to work, and so was cut first. The mother trees are gone and fires killed the baby trees. For a wall of green they are the best trees. Does your flower-garden need a background of dark green to show off its beauty? Perhaps a hedge of Pines will be just what is needed. Each 10

A HICKS planting of Japanese Yew ornamenting entrance at home of Edward S. Voss, Westbury, L. I. It is the best substitute for Dwarf Boxwood. Framing of entrance is only one of the many charming effects created by its use. Japanese Yew has a darker, richer green foliage than Boxwood, plus extreme hardiness and distinctiveness of character. The flat and dwarf forms of Japanese Yew can be kept to the desired height and width by a slight clipping once or twice a year.
PSEUDOTSUGA
PSEUDOTSUGA (PICEA DOUGLASI). Douglas Spruce. You can keep Douglas Spruce taller and more narrow than most other evergreens, therefore consider the plants for situations where you need a screen not over 10 feet wide. The foliage is a light bluish green; the growth is dense and symmetrical.

TAXUS • Yew
Of all the evergreens for small places these are pre-eminent. Dark green, fine-textured foliage, not affected by cold or heat, and small stature is the technical analysis, but you will have to get acquainted with them to know why they are better for your place. Popularizing the Japanese Yew was one of the achievements of the Hicks Nurseries. The species was introduced by Dr. Hall, a missionary to Japan. He recognized the similarity in climate and brought over the plants to Parson's Nursery, Flushing, L. I., to introduce.

T. CUSPIDATA. Japanese Yew. (Flat Form.) A prostrate form of the Japanese Yew. Flat-topped and wide-spread. Can be kept trimmed to substitute for dwarf boxwood. The reason these are flat is that for dwarf boxwood. The reason these are flat is that they are grown from cuttings of side branches of the upright form. Another point about Japanese Yew is its indifference to shade or sunshine; the bright sun does not brown it, and the deep shade only makes it darker and richer.

A TERRACE hedge planting of *Taxus media* *Hicksi* (Hicks' Yew). This form of Japanese Yew has become the most popular evergreen hedge plant. It is a new variety which originated in our Nurseries and became popular for its narrow, upright form, dark color, and hardiness. Hicks' Yew is almost exactly the same form as the Irish Yew formerly largely planted in this country, but mostly destroyed by winter-killing. Perhaps a hedge would economically beautify your home-grounds.

The large Elm shown in illustration was also supplied and planted by Hicks Nurseries.
### Evergreens

**THUJA OCCIDENTALIS ERICOIDES.** Sometimes called Heath Retinospora. A dwarf, broadly pyramidal form, with soft, dull green foliage.  
1½ to 2 ft. high ............................................. $3 00 $27 50  
2 to 3 ft. high ............................................. 3 00 27 50

1½ to 2 ft. high ............................................. $4 00 $37 50  
2 to 3 ft. high ............................................. 3 00 27 50

**T. OCCIDENTALIS HOVEYI.** Honey Arborvitae. Dwarf, dense, globose form with bright green foliage.  
1½ to 2 ft. high ............................................. $3 00 $27 50  
2 to 3 ft. high ............................................. 4 00 37 50

**T. OCCIDENTALIS LUTEA.** George Peabody Arborvitae. Pyramidal form with bright yellow foliage.  
1½ to 2 ft. high ............................................. $3 00 $27 50  
2 to 3 ft. high ............................................. 4 00 37 50

**T. OCCIDENTALIS SPIRALS.** Compact form with very close-set short branchlets. The twisted branchlet system suggests spiral arrangement.  
2 to 3 ft. high ............................................. $3 50 $30 00  
3 to 4 ft. high ............................................. 5 00 45 00

**T. PLICATA.** Western Arborvitae. A pyramidal tree with rich, deep blue-green, dense foliage giving pleasing effect.  
2 to 3 ft. high ............................................. $5 00 $45 00  
3 to 4 ft. high ............................................. 5 00 45 00  
4 to 5 ft. high ............................................. 7 50 70 00  
5 to 6 ft. high ............................................. 10 00 90 00  
6 to 7 ft. high ............................................. 12 00 100 00  
7 to 8 ft. high ............................................. 15 00 125 00  
8 to 10 ft. high ............................................. 20 00 175 00

**T. STANDISHI.** Rather thick, compressed, bright green foliage. Handsome tree with rather broad head, quite different from the other species.  
2 ft. high ............................................. $3 00 $27 50  
3 ft. high ............................................. 3 50 30 00  
4 ft. high ............................................. 5 00 45 00  
6 to 7 ft. high ............................................. 12 00 100 00

1½ to 2 ft. high ............................................. $4 00 $37 50  
2 to 3 ft. high ............................................. 5 00 45 00  
3 to 4 ft. high ............................................. 7 50 70 00  
7 to 10 ft. high ............................................. 20 00

**TSUGA· Hemlock**

**TSUGA CANADENSIS.** Canada Hemlock. Very graceful tree with dark green foliage, doing best in sheltered situations. Wonderful for hedges because it keeps full and broad at the base. It withstands the most severe kind of cutting back and does best if pruned to a broad oval form.  
1 to 2 ft. high ............................................. $1 50 $15 00  
2 to 3 ft. high ............................................. 3 00 27 50  
3 to 4 ft. high ............................................. 5 00 45 00  
4 to 5 ft. high ............................................. 8 00 70 00  
5 to 6 ft. high ............................................. 10 00 90 00  
6 to 7 ft. high ............................................. 12 00 100 00  
7 to 8 ft. high ............................................. 15 00 125 00  
8 to 10 ft. high ............................................. 20 00

---

**Why Hicks Evergreens Prove Best**

They have been grown for quality and make dense, rapid growth because of transplanting and root-pruning. When dug, there is a good fibrous root-system within the ball of earth. Canvas covers, invented by Hicks, clamp the ball of earth securely. This is the greatest invention for the moving of trees because, with this canvas and men that know how to use it, almost any kind of tree can be moved successfully at any time of the year. The securely held ball, lashed to platform, is transported to your place, and the tree is planted without the roots being exposed and disturbed. It continues its growth without any serious setback. You will find Hicks evergreens best because you can personally select the size and variety best suited for your purpose, know that they will be dug and planted right, and are insured of success by our guarantee.
Garden of Dwarf Evergreens and Evergreen Shrubs at residence of Mr. S. Z. Mitchell, Locust Valley, L. I., designed by Olmsted Brothers, Brookline, Mass.

Attractive entrance to estate of Wilton Lloyd-Smith, Huntington, L. I. The planting was designed to allow clear vision for safety and consists of Hemlocks, Rhododendrons, Laurel, Leucothoe, and Pachysandra, giving all-year effect and blending well with the natural surroundings. Photo was taken immediately after planting, four years ago. The effect is now greatly enhanced.
EVERGREEN SHRUBS

IT IS this class of plants that gives finish and richness to the home landscape. The green foliage is held throughout the year, thereby adding to the winter aspect of lawn and garden. No landscape or garden is altogether satisfactory without the use of these beautiful plants that afford such a wide range of selection in producing some of the most pleasing results.

Broad-leaved evergreens are comparatively higher priced than the common fast-growing evergreen trees, but in many plantings, especially foundation plantings, their use would ultimately prove more economical. If you want a foundation planting, choose in texture and color, make your selection from this list of Evergreen Shrubs. They are also particularly adapted for planting in the evergreen- and rock-garden, for covering banks, edging groups of tall shrubs and evergreens, and as a border for drive and woodland.

Long Island soil is suited to the growing of this class of plants. The soil you have, plus a mulch of decayed leaves, is all that is required. Watering, of course, is necessary during the dry season.

ABELIA GRANDIFLORA. Glossy Abelia. A little shrub with pink bells all summer. Protect it with cornstalks or burlap in winter and it will not be killed back. Blooms like a miniature weigela, with flowers as pleasant to discover as arbutus. Each 10

1 to 2 ft. high. $2.00 $1.00

ANDROMEDA FLORIBUNDA (Pieris floribunda). Mountain Andromeda. A little gem of the rhododenron and laurel family, growing about 2 feet high, with light green foliage that is perfectly hardy. It appears as if, it bloom all winter, for above the foliage are clusters of buds which open early in March with lily-of-the-valley-like flowers. It is particularly appropriate at the outer edge of mass-plantings of choice evergreens about the foundation of a house, and can be used in the rock-garden. Each 10

1 to 1½ ft. high. $1.00 $2.75 50

A. JAPONICA (P. japonica). Japanese Andromeda. This has long racemes of lily-of-the-valley-like flowers which come so early that they are sometimes covered with snow and ice. It is liable to have blossom-buds winter-killed unless it is in a sheltered place. Excellent for rockery and house foundation. Each 10

1 to 1½ ft. high. $3.00 $2.75 50

B. MOUNTAIN. A dwarf shrub of trailing habit. It is covered with brilliant red berries in autumn and winter. The foliage turns to tints of red and bronze before falling in early winter. Ideal for the rockery and cover-planting. Each 10

Plants, 4 to 6 in. spread, from 5 in. pots. $0.75 $0.75 00

DAPHNE CNEORUM. Garland Flower. Little trailing evergreen plant about 6 inches high and 1 foot wide, with pink flowers in May and again in late summer. The spicy perfume you will enjoy and never forget. Begin the habit of buying little plants in pots or with clumps of earth. Tuck them in where there is room for a plant of 1-foot spread at the house foundation, in rockery, or flower border. Each 20

10 to 12 in. high. $1.50 $1.25 50

EUONYMUS NANUS. Dwarf evergreen plant that can be used as a substitute for boxwood edging. Each 10

6 in. high. $0.75 $0.75 00

E. RADICANS VEGETUS. Big-leaf Wintercreep. A diminutive or Tom Thumb variety with leaves 1 inch long. Use it as a border to the garden of little evergreens or to carpet the ground beside the woodland path. Excellent for the rockery. Each 10

4 to 6 in. spread. $0.75 $0.75 00

E. RADICANS KEWENSIS. Baby Wintercreep. A dwarf shrub of trailing habit. It is covered with brilliant red berries in autumn and winter. The foliage turns to tints of red and bronze before falling in early winter. Ideal for the rockery and cover-planting. Each 10

Plants. 10 to 12 in. high. $1.50 $1.25 50

ILEX CRENATA. Japanese Holly. The leaf is like that of boxwood, not the Holly, and the berries are black. You will find it most happy in among other evergreens in the foundation planting or out among the pines and shrubs or in the woods. The outline of the plant is open and picturesque, not smooth like the boxwood. The tips of the plants may winterkill if grown in the open, but that is no objection; it merely trims it back and keeps it down to a most useful size. Each 1½ to 2½ ft. high. $3.00
Garden of Mr. G. S. Rentschler, Locust Valley, L. I. Very charming effect created by the use of Mountain Laurel, with ground-cover planting of Pachysandra.

Leucothoe catesbaei. In shady places this is very decorative, with its long, graceful, arching branches of foliage turning red and purple in winter.
LEUCOTHOE CATESBAJ. A very neat evergreen shrub with leaves like boxwood, and black berries. It is more compact and has smaller leaves than L. crenata and is considered more hardy. Each 1 to 1 1/2 ft. high 3.00
2 1/2 to 3 ft. high 5.00
I. GLABRA. Inkberry. A native shrub making a round green bush about 3 feet high, like box. Has small black berries. Use it in quantity for your evergreen garden and foundation planting; naturalize it along ponds, streams, sand-dunes, or at the edge of a woodland. Each 10
8 to 12 in. high 75
1 to 2 ft. high 1.00
I. OPACA. American Holly. The Holly is native along the coast as far north as Cape Cod, including Long Island. It is a beautiful tree and can be used for hedges. As it does not like to have the sun shine on its head, nestle it among pines and oaks as you see it in the woods. It will not keep its color out in the winter sun. Holly is slow to start growing, so don't expect to get big ones cheap, but plant a lot of small ones. Take out some of the overgrown evergreens in foundation planting and replace with Holly. Each 10
2 to 3 ft. high 95
3 to 4 ft. high 100
4 to 5 ft. high 125
Larger sizes Prices on application
KALMIA ANGUSTIFOLIA. Lambkill. A dwarf shrub, native in moist places, with narrow leaves and deep crimson-pink flowers borne in great profusion in June and July. Each 10
1 to 1 1/2 ft. high 75
K. LATIFOLIA. Mountain Laurel. Here is something you can use by thousands to decorate your woodland, plant in the open lawn or border, under-plant evergreen windbreak or screen, mass at the foundation of the house, or plant just for its own beauty. You can add it to your commonplace shrub border. You will get extra quality and value. We have big, broad shrubs with large balls of earth. You can plant them all summer. All they ask is to have you tuck them in with leaves and give them a drink the first summer. The flowers are abundant in late June, but the crowning glory is the all-the-year foliage in billowy masses. Laurel is immediately what it is going to be, and is entirely harmonious in this region. Each 10
1 to 1 1/2 ft. high 50
2 to 2 1/2 ft. high 75
2 1/2 to 3 ft. high 125
Ask for quantity prices.
LEUCOTHOE CATESBAJ. Drooping Leucothoe. A close relative of the laurel and native of the southern mountains. Evergreen foliage like laurel but bronzed in winter. Flowers like crowded lily-of-the-valley. A shrub that will make two dozen plants. Every joint takes root, and a mat 1 foot wide can be made very quickly. Flowers, however, are about 1 1/2 inches long, and the leaflets are twice as large as those of the holly, with strong, sharp spines. Each 10
1 1/2 to 2 ft. high 5.00
M. BEALEI (M. JAPONICA). Leatherleaf Mahonia. This looks even more like a holly, because the foliage does not bronze so much during winter. The leaves are about 1 1/2 inches long, and the leaflets are twice as large as those of the holly, with strong, sharp spines. Each 10
2 to 2 1/2 ft. high 4.00
PACHISTIMA CANBYI. Canby Pachistima. A green cover-plant 8 inches high. Little green and bronze leaves. It is native on cliffs in the Alleghanies. Use it in quantity as a green, velvety rug. It is related to wintercreeper and sometimes called "Mountain Lover." Each 10
4 to 6 in. high 75
PACHYSANDRA TERMINALIS. Japanese Pachysandra. An evergreen cover-plant growing about 8 inches high. It has leaves nearly as large as laurel and is particularly at home under it and similar plants. In groups of evergreens about the foundation of a house, the sight of bare ground is particularly disagreeable. Pachysandra will make a close carpet, covering all the area because it spreads from underground roots. It is perfectly hardy and keeps a cheerful green foliage all winter. In early spring it bears small spikes of inconspicuous flowers which, while not adding to the beauty of the plant, are very attractive to bees. Each 10
2 to 6 in. high 1.00
PYRACANTHA COCCINEA LALANDI. Laland Firethorn. A vigorous and hardy evergreen shrub. White flowers in flat-topped clusters in spring, followed by brilliant orange-colored berries. The foliage is rich and glossy. Especially adapted for training against walls. It thrives better in a sunny situation or partial shade, but fruit is more highly colored in a sunny situation. Each 10
2 to 3 ft. high 30
3 to 4 ft. high 40
RHDODENDRONS. See page 41 for list and prices.
VINC A MINOR. Common Periwinkle. This frequently has escaped from old farmyards and spread along the roadsides. As it is entirely hardy, it will make a thick green carpet under a growth of pine, spruce, or oak, but not where grass has died under maples. It trails along the ground, taking root as it spreads, and makes a mat of deep green foliage about 4 inches high. With the coming of the first violet, it has numerous blue flowers. It is sometimes used for garden borders. Every joint takes root and a mat 1 foot wide can be shaken apart and will make two dozen plants. Each 10
2 to 4 in. high 20
Hicks Nurseries, Westbury, N. Y.
BUXUS SUFFRUTICOSA
Dwarf Boxwood

The boxwood of many gardens, especially the old-time ones, lends a sense of beauty and dignity that is difficult to surpass. The velvety domes of dark green have a distinctiveness and character that will keep boxwood always in demand. Dwarf boxwood has a closer and more velvety texture than tree box. In seventy-five years it grows about 8 feet high.

If interested in boxwood, you should see our large display. Beautiful, matched specimens, 2 to 8 feet high, may be selected. We also have available dwarf boxwood hedging.

Prices and photographs will be sent upon request.
AZALEAS AND RHODODENDRONS

HERE is a really great offering that should receive the attention of owners of small and large estates. The plants are available in quantity, in good quality, and at low cost. They represent many years of time and effort, and Hicks Nurseries are justly proud of having made them available in such large quantities. Most of them have been grown from seed. A plant 1 to 1 1/2 feet high is six years old. They are harder than the plants imported years ago. Azaleas and Rhododendrons are alike. You recognize Rhododendrons by the rather large evergreen leaves and Azaleas by the small, mostly deciduous foliage. Azaleas are among the most interesting of flowering shrubs. In the size and abundance of bloom and in the brightness and variety of coloring there is hardly anything in the vegetable kingdom which can equal the beauty of this group of plants. The large, thick, glossy foliage of Rhododendrons renders them objects of beauty the year through. When in bloom, the bushes are covered with great heads of large, bright-colored flowers.

Lime is an enemy of many plants, and especially those of the heath family, to which Azaleas and Rhododendrons belong. On Long Island we have no trouble growing Azaleas and Rhododendrons and other acid-soil plants. Long Island has no stratum of rock near the surface, and the soil has all been brought by ice and water. It is so porous that the lime has been leached out. There may be a slight exception to the above statement. When associated with trees, especially oaks, at fringe of woodland, or to glorify the shrubberies on lawn or at the house foundations.

Better come to Hicks Nurseries and get acquainted with this large offering of Azaleas and Rhododendrons. Seeing is believing. Sweeps of color in the open, in the woods, and in the sales-building are for your pleasure. Whether you come to enjoy or to buy, you are welcome.

AZALEAS

Nothing in flowers could be more brilliant and showy than those of the Azalea. They belong to the same genus as rhododendrons and can be harmoniously planted with them. Most of them will have finished blooming when the rhododendrons begin.

Select a place and plant them this spring, or even when they are in bloom, or later. Carry out the idea of a fairy woodland. The colors range through white, orange, lemon-yellow, yellow, light pink, deep pink, bright red, and deep red. The main thing is to get them planted. Then as they grow and bloom, move them apart, extend the area, and arrange the color-harmony to express your ideas. All they ask is a mulch of oak leaves all the year, and moisture. They are thankful for shade.

Make Azaleas a delightful feature of your landscape. Their particular purpose is spreading sweeps of color in the garden, at edge of woodland, along the drive, or in the shrub and evergreen border. A delightful effect is obtained by using them with other low-growing plants at the house foundation.

AZALEA ARBORESCENS. Sweet Azalea. Flowers sweet-scented, white with long red styles and stamens. This species has flowers like the Swamp Azalea, but blooms in June. It makes a round, compact bush. The bright green foliage assumes a rich shade of crimson in autumn. One of the easiest Azaleas to cultivate, thriving in almost any situation. A very desirable and showy plant for your landscape.

A. CALLEDULACEA. Flame Azalea. This grows in the Alleghany Mountains. It has bright orange flowers in May. Bartram, the early botanical explorer, said the mountains looked as if afire, from the large quantities of these flowers. It is one of the parents of the Gheest hybrids and equals many of the varieties in size, form, and color of its flowers. You should use them in quantity for naturalizing woodland or in combination with other Azaleas for spreading sweeps of color.

INCREASE. Piedmont Azalea. Slightly fragrant, blush-pink flowers in early May. Each 10

1 1/2 to 2 ft. high..........................$1 50 $12 50
2 to 2 1/2 ft. high..........................$2 50 $22 50

A. DAHURICA. The first to display its beauty in early spring. Its flowers are a beautiful shade of rose-purple, and come before the leaves appear. For best effect they should be planted in mass with an evergreen background. They attain considerable height and therefore show up at quite a distance. An attractive, rare variety which should be in every collection.

A. HINOEGIRI. Hinoegiri Azalea. The most popular Azalea with evergreen foliage, and makes the brightest spot in your landscape in early May. It forms a little, low plant 1 foot high, thickly covered with bright carmine-red flowers. Give it a mulch of leaves and the shade of trees and shrubs.

A. INDICA ALBA (A. LENTIS). Snow Azalea. A choice evergreen Azalea with white flowers about 2 1/2 inches across in the middle of May. It may suffer somewhat in severe winters, but is worthy of a sheltered place or artificial protection.

A. JAPONICA. Japanese Azalea. Vigorous shrub with handsome orange-red flowers. Each 10

10 to 12 in. high..........................$1 50 $12 50

A. KAEMPFERI. Torch Azalea. A rare Japanese species with bright fire-red flowers in May, sometimes continuing into June. A showy, tall-growing Azalea particularly adapted for mass-planting along drives or at edges of woodland.

1 to 2 ft. high..........................$2 50 $22 50
2 to 3 ft. high..........................$4 00 $37 50
3 to 4 ft. high. Specimen plants........12 00
4 to 5 ft. high. Specimen plants........16 00

Hicks Nurseries, Westbury, N. Y.
This planting of Rhododendrons illustrates the charming effects obtained by the use of Azaleas and Rhododendrons. They should be used as mass-plantings at the base of evergreen groups, along drives, or at edge of woodlands.
AZALEA MOLLIS. Chinese Azalea. Large, funnel-shaped, orange-and-yellow flowers in early May before the leaves appear. A hardy Azalea, thriving under ordinary garden conditions. Like most other Azaleas, it prefers a partially shaded, protected spot.

A. MUCRONULATUM. Mongolian Azalea. This rare, early-flowering Chinese Azalea has pinkish lavender flowers similar to A. dauricum, but blooms two weeks later, along with forsythia or Golden Bell, and forms a wonderful color-contrast. It will grow to a height of 5 feet and can be used in the shrub border or wherever an early spring show is desired.

A. NUDIFLORA. Pinxterbloom. This is the wild pink Azalea, blooming in the middle of May. It is found wild on Long Island in several places, especially on the sandy hills sloping to the north, with a spring at the bottom, protected from dry winds and bright sun.

A. POUKHANENSIS. Korean Azalea. This is the common Azalea of Korea, and was first introduced into cultivation in 1905. In gardens it is a densely branched, round shrub 2 to 4 feet high and more broad. Its rosy purple flowers are rich in delightful fragrance. The leaves are deciduous, and in autumn are tinted orange to crimson.

A. ROSEA. Downy Pinxterbloom. Fragrant pink flowers appearing with the leaves.

A. VASEYI. Pink-shelled Azalea. Sometimes it is called Carolina Azalea. It is the most beautiful pink variety, with large flowers in early May before the big show of Azaleas. Big, sturdy, fast-growing plants that form open but not compact shrubs. Count the buds and see how many you will get of the beautiful flowers ranging from nearly white through all the shades of pink to a deep pink.

A. VISCOSA. Swamp Azalea. A vigorous shrub native on Long Island. Beautiful, fragrant, white and pink-tinted flowers in June and July. One of the latest of the Azaleas to bloom. Perhaps you have often caught a whiff of fragrance on a damp evening when crossing the bridges on the Merrick Road; it was the Swamp Azalea and sweet pepper-bush. You can plant them in among other shrubs or make a new plantation along your boundary, under your trees, up on the hill or in the valley.

A. YODOGAWA. Yodogawa Azalea. A low-branched, spreading plant, with double pinkish lavender flowers in early May.

RHODODENDRONS

The perfection of flowering shrubs. Certainly few shrubs possess greater beauty and usefulness for decorating the home landscape. You should visit our Nurseries in late May and early June when the Rhododendrons are in bloom. We do not ask you to buy, but we think it worth your while to get acquainted with them. You will find the hybrid seedlings of particular interest because they are of an economical size and good color.

Rhododendrons are easy to grow. Give them a little common-sense treatment and consideration, and they are the happiest kind of shrub, giving you ample returns for your pains in a rare wealth of blooms and a rich green foliage that is beautiful the year round. They give an effect always full of character and interest.

For best effect, they should be planted in groups. They prefer a light loamy soil to which has been added a quantity of leaf-mold. Mulch with oak leaves and keep them so always full of character and interest. They give an effect the happiest kind of shrub, giving you ample returns for a nominal size and good color.

RHODODENDRON CAROLINIANUM. Carolina Rhododendron. Winter foliage reddish green, red stems. Compared with the Rhododendron you think of—the Catawbiense and Maximum varieties—it is a small edition, a dwarf, lower plant, and yet it is not a puny or weak plant. It is vigorous and happy. Best of all, it gives a new note in a new season. It is a sheet of rosy pink bells before the other Rhododendrons bloom. Use it in great quantity. Splendid for a mass-planting at drive, entrance, or in rock-garden.

RHODODENDRON CAROLINIANUM ALBUM. White Carolina Rhododendron. This is a white variety similar to preceding in habit.}

R. CATAWBIENSE HYBRID SEEDLINGS. Catawbiense Rhododendron. Here is a new and good way to get more color and evergreen foliage. The plants are grown from the seed of cross-pollinated, named hybrids. The grafted, named varieties are available only in small quantities, but these are more abundant. A large proportion of colors are the same. During the June flowering season you may come to the Nursery and pick out some of them in bloom. Each 10 100

R. CATAWBIENSE, NAMED HYBRIDS. Catawbiense Rhododendron. These are for those who desire the best in Rhododendrons. They are choice named varieties with lavender, red, rose, and white flowers. Their use insures your color-scheme. Each 10 100

R. Maximum. Rosebay Rhododendron. This species grows from Nova Scotia southward, with big pink flowers in early July after Catawbiense has finished blooming. The leaves can always be distinguished, because they are twice as long as those of the Catawbiense Hybrids. Each 10 100

[ 41 ]
FLOWERING DECIDUOUS SHRUBS

GOOD home landscape demands the free use of Flowering Shrubs. They quickly develop into dense masses of foliage serving effectively as screens and boundaries along highways and adjoining properties. A splendid effect is obtained by planting them at the base of the house or other buildings. They make the most interesting hedges for framing gardens and bordering walks. Flowering shrubs give big value on a small investment.

2 to 3 ft. high. $0.75 $7.00

A. TATARICUM. Tatarian Maple. The earliest and brightest autumn color, at the same time as the Virginia creeper, dogwood, and liquidambar. It makes a shrub 12 feet high and 8 feet broad. Use them for a hedge, setting 3 feet apart, and in mixed planting of shrubs and trees.

2 to 3 ft. high. $0.50 $4.00
3 to 4 ft. high. $0.75 7.00

AMELANCHIER OVALIS. Garden Shadbush. Small shrub with white flowers before the apple blossoms, and sweet berries in June.

2 to 3 ft. high. $0.75 $7.00

AMYGDALUS COMMUNIS. Pink and White Double-flowering Almond. An old-fashioned shrub 2 feet high with little, pink, double flowers along its stems in May.

2 to 3 ft. high. $1.00 $9.00

ANDROMEDA (PIERIS) MARIANA. and White Double-flowering Almond. An old-fashioned shrub 2 feet high with little, pink, double flowers along its stems in May.

2 to 3 ft. high. $1.00 $9.00

C. RUBRIZANCA. Japanese Blood-twig Dogwood. A most showy winter shrub, with charming blood-red bark all winter. Should be used in large groups for best effect. White flowers in summer and pearly white berries in fall. Each 1 to 1 1/2 ft. high. $1.00 $9.00

ARALIA PENTAPHYLLA. Five-leaved Aralia. Medium-growing shrub; attractive foliage. Each 3 to 4 ft. high. $0.75 $7.00

ARONIA ARBUTIFOLIA. Red Chokeberry. Native white-flowered shrub 3 to 5 feet high, with red berries persisting till late fall.

2 to 3 ft. high. $1.00 $9.00
3 to 4 ft. high. $1.25 $11.00

A. ARBUTIFOLIA BRILLIANTISSIMA. Berries more brilliant red than preceding. Each 2 to 3 ft. high. $1.00 $9.00
3 to 4 ft. high. $1.25 $11.00

BENZOINæSTIVALE. Spice-bush. A shrub native to damp ground, growing 15 feet high. In April, when the forsythia is in bloom, this has clusters of small yellow flowers along the twigs; in September it has bunches of red berries.

2 to 3 ft. high. $0.50 $4.00

BERBERIS THUNBERGI. Japanese Barberry. Used extensively for hedges and its glow of red berries, which remain all winter.

1 1/2 to 2 ft. high. $0.35 $3.00
1 1/2 to 2 ft. high. $0.50 $4.00
1 1/2 to 2 ft. high. $0.75 $7.00

B. VULGARIS. Common Barberry. Good border plant, growing 8 feet high. Graceful, arching branches with long clusters of red fruit.

2 to 3 ft. high. $0.75 $7.00

BUDDLEIA DAVIDI. Butterfly Bush. Correctly named "Butterfly Bush," for the butterflies are fluttering over it when the sun shines. From June until frost, long, arching racemes of lilac flowers.

2-yr. plants. $0.50 $4.00

CALYCANTHUS FLORIDUS. Common Sweet Shrub. Fragrant brown flowers. You remember carrying the sweet-scented buds in your handkerchief when a child. A shrub 5 feet high will flower in June. Plant in masses at the border of the shrubbery, for they will hold the mulch.

1 1/2 to 2 ft. high. $0.75 $4.50
2 to 3 ft. high. 75 7.00

CEPHALANTHUS OCCIDENTALIS. Button Bush. Although this will grow in fresh water a foot deep, it likes dry upland. It makes a round bush, 6 feet high, with heavy, glossy foliage, decorated in July with clusters of white balls an inch or more in diameter.

2 to 3 ft. high. $0.75 $7.00
3 to 4 ft. high. 1.00 9.00

CLETHRA ALNIFOLIA. Passiflora. Summer-sweet. Passing over damp ground in June and July, you have probably noted a distinct, honey-like perfume and traced it to the Clethra, with its finger-shaped spikes of white flowers. It is a shrub growing about 8 feet high which thrives well on the upland.

2 to 3 ft. high. $0.75 $7.00
3 to 4 ft. high. 1.00 9.00

CORNUS MAS. Cornelian Cherry. A week or two before the Forsythia, or Golden Bell, this is a mass of bright yellow, like the spicewood of the swamps; in August it looks like the tree cranberry. The fruits have been used for jam and to make an acid drink. You can use this plant in your shrubbery or among your collection of small trees, for it grows ultimately 15 feet high.

3 to 4 ft. high. $2.00 $17.50
4 to 5 ft. high. 4.00 37.50
5 to 7 ft. high. 5.00 45.00

C. PANICULATA. Gray Dogwood. Panicles of white flowers in June and July. White berries in September that are enticing to birds.

1 to 2 ft. high. $0.50 $4.00
2 to 3 ft. high. 75 7.00
3 to 4 ft. high. 1.00 9.00

C. SANGUINEA. Blood-twig Dogwood. A most showy winter shrub, with charming blood-red bark all winter. Should be used in large groups for best effect. White flowers in summer and pearly white berries in fall.

Each 1 to 2 ft. high. $0.50 $4.00
3 to 4 ft. high. 75 7.00

C. STOLONIFERA FLAVIRAMEA. Golden-twig Dogwood. Like the preceding variety, but bright yellow bark all winter. Use them both to brighten your winter landscape. If you cut the older branches to the base of the house or other buildings. They make the most interesting hedges for framing gardens and bordering walks. Flowering shrubs give big value on a small investment.
CORYLOPSIS PAUCIFLORA. Buttercup Winter Hazel. An interesting small shrub 2 to 3 feet high, with pale yellow, fragrant flowers in early spring, borne in short racemes. It is a native of Japan. Each
Strong plants from 4-in. pots $2.00

THE COTONEASTERS

These beautiful plants, introduced from China, are proving to be the most useful of foreign shrubs. Some have foliage that is nearly evergreen, changing to tints of red and bronze before falling in early winter. Their gracefulness of habit and beauty of flower and fruit make them most ideal for planting at house foundations, entrances, hedges, or for cover-planting. They vary in habit from large, bold bushes to dwarf, spreading type.

COTONEASTER DIELSIANA. A shrub with large, glossy leaves and black fruit. Each 10
2 to 3 ft. high $0.75 $1.00
3 to 4 ft. high $1.00 $1.50

COTONEASTER DIETZIANA. Diehl’s Cotoneaster. Tall-growing shrub with showy, bright red fruit in autumn and early winter. Each 10
1 to 2 ft. high $0.75 $1.00
5 to 6 ft. high $2.00 $2.50

COTONEASTER MOUPINENSIS. Zabel’s Cotoneaster. Medium-high shrub with slender, graceful branches and red, hanging fruits. Each
1 ½ to 2 ft. high $0.75 $1.00
2 to 3 ft. high $1.00 $1.50
3 to 4 ft. high $1.50 $2.00

COTONEASTER ZABELI. Zabel’s Cotoneaster. Medium-high shrub with slender, graceful branches and red, hanging fruits. Each
1 ½ to 2 ft. high $0.75 $1.00
2 to 3 ft. high $1.00 $1.50
3 to 4 ft. high $1.50 $2.00

CYDONIA JAPONICA. Japanese Quince. The old-fashioned Fire Bush. Brilliant red flowers in early May. It is just as handsome as it was years ago. Each
3 to 4 ft. high $2.00 $2.50

THE DEUTZIAS

Vigorous shrubs with showy flowers, and of easy culture, thriving in almost any soil. They give striking effects in garden or border plantings. Include them in your shrub list.

DEUTZIA GRACILIS. Slender Deutzia. Low-growing mound of white flowers in May. Each
1 to 2 ft. high $0.75 $1.00

D. LEMONEI. Lemoine Deutzia. Showy white flowers. Each 10
1 to 2 ft. high $0.50 $0.75

D. SCABRA (Crenata). Pink Deutzia. Pink, slightly fragrant flowers in June. Each 10
4 to 5 ft. high $1.00 $1.25

D. SCABRA, PRIDE OF ROCHESTER. Double white flowers in June, with band of pink on outside petals. Strong, upright shrub 8 feet high. Each
5 to 6 ft. high $2.00 $2.50

ELEAOKRUS LONGIPES. Cherry Elaeagnus. A shrub about 5 feet high, bearing, in July, large cherry-like fruits ½ inch long, with a currant flavor. When in full bearing it is an attractive shrub. Each
3 to 4 ft. high $0.75 $1.00
4 to 5 ft. high $1.00 $1.25

E. UBEMBLLA. Autumn Elaeagnus. Grows 15 feet high, producing masses of red berries that give food for birds and a touch of color when leaves fall. Each
6 to 8 ft. high $2.00 $2.50

ENKIANTHUS CAMPANULATUS. Red-vein Enkianthus. It resembles its relative, the high-bush blueberry, in size and brilliant autumn foliage. In May it has pink bells like the andromeda. Each
2 to 3 ft. high $1.00 $1.25
3 to 4 ft. high $1.50 $2.00

EUONYMUS ALATUS. Winged Euonymus. One of the showiest shrubs of which we know. Combines the corky ridged bark of the sweet gum tree with the bright foliage of the Tatarian maple and the abundant brilliant carmine fruit of the Japanese barberry. They can be planted through the woodland for the birds or scattered along your shrubbery. Each
2 to 3 ft. high $1.00 $1.25
3 to 4 ft. high $1.50 $2.00

E. BUNGEANUS (Sieboldianus). Winterberry Euonymus. Large shrub. Fruits profusely. The orange and white seed-pods persist on the bush for a long time. Good autumn coloring. Each
1 to 2 ft. high $0.75 $0.90

3 to 4 ft. high $1.00 $1.25

THE TACAMAS

These beautiful plants, introduced from China, are proving to be the most useful of foreign shrubs. Some have foliage that is nearly evergreen, changing to tints of red and bronze before falling in early winter. Their gracefulness of habit and beauty of flower and fruit make them most ideal for planting at house foundations, entrances, hedges, or for cover-planting. They vary in habit from large, bold bushes to dwarf, spreading type.

C. TOMENTOSA. Tall-growing. Leaves dull green above, grayish beneath. Pink flowers and brick-red fruit. Each
3 to 4 ft. high $1.00 $1.25

Glossy, dark green leaves with red berries all winter. Desirable in shrub borders because of color and spreading habit of growth. Birds are very fond of the berries. Each 10
1 ½ to 2 ft. high $0.75 $1.00
2 ½ to 3 ft. high $1.00 $1.50

C. DIVARICATA. Spreading Cotoneaster. Glossy, dark green leaves with red berries all winter. Desirable in shrub borders because of color and spreading habit of growth. Birds are very fond of the berries. Each 10
1 ½ to 2 ft. high $0.75 $1.00
2 ½ to 3 ft. high $1.00 $1.50

C. Foveolata. Tall-growing shrub with handsome autumn-tinted foliage and black fruits. Each 10
2 to 3 ft. high $0.75 $1.00
3 to 4 ft. high $1.00 $1.50

C. HORIZONTALIS. A dwarf shrub with small pinkish flowers and orange-red berries. Each 10
1 to 2 ft. high $0.75 $1.00

C. Nitens. A densely branched, tall-growing shrub with small shiny leaves and black fruit. Each 10
2 to 3 ft. high $0.75 $1.00
3 to 4 ft. high $1.00 $1.50

C. Racemiflora Soongarica. Hardy, red-fruited variety of medium height, with handsome foliage. Each 10
3 to 4 ft. high $1.00 $1.50

1 to 1 ½ ft. high $0.75 $1.00

C. Simonsi. Tall, handsome, half-evergreen shrub with scarlet fruit. Each 10
3 to 4 ft. high $1.00 $1.50

C. Tomentosa. Tall-growing. Leaves dull green above, grayish beneath. Pink flowers and brick-red fruit. Each
3 to 4 ft. high $1.00 $1.25

[ 43 ]
Kolkwitzia (Beauty Bush). An exceedingly handsome shrub. Has all the merits of a perfect shrub—hardiness, all-year beauty of foliage, habit, and profusion of flowers.

Viburnum opulus (European Cranberry). One of the best tall shrubs for red berries. It grows 8 to 10 feet high, with healthy foliage and handsome, flat-topped flower-heads, surrounded by a row of sterile blossoms.

Block of Spiraea vanhouttei. Hicks’s shrubs are vigorous, broad plants that give pleasing, satisfactory results at once. With Flowering Shrubs you get a big show at little cost.

Weigela. One of the most useful shrubs on account of its vigorous growth and free-flowering habit. Will grow 8 to 10 feet high and equally broad.

Chokeberry. It belongs to the apple family, and has little white flowers in May, followed by red berries in October.

Philadelphus, Virginal (Fragrant Syringa). A very showy variety with large, white, fragrant flowers completely covering the plant. We can bring you truck-loads of shrubs any time of the year.
EXOCHORDA GRANDIFLORA. Common Pearlbush. A tall-growing shrub having snowy white flowers in May. 3 to 4 ft. high. $0.75 $7.00

FORSYTHIA • The Golden Bells

Few, if any, spring-flowering shrubs can equal the splendor and brilliancy of the Forsythia. By the middle of April it commences to hang out its festoons of golden bells. The different forms vary in growth from 6 to 10 feet. Excellent for hedges.

FORSYTHIA INTERMEDIA. Border Forsythia. A heavier-blooming form of Fortune’s Forsythia.

</table>

HAMAMELIS JAPONICA. Japanese Witch-hazel.

Blooms late in the fall, and the flowers remain more or less through the winter. A race of lemon-yellow.

1 1/2 to 2 ft. high. $1.50

H. VIRGINIANA. Common Witch-hazel. Latest shrub to blossom. Long after foliage has fallen, the lemon flowers like fine strips of paper appear in profusion. It grows 8 feet high.

<table>

Hicks Nurseries, Westbury, N. Y.

Flowering Shrubs

LONICERA KOROLKOWI. Blue-leaf Honeysuckle. Tall-growing shrub with bluish green leaves. Rose-colored flowers. Bright red fruit. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

L. MAACKII. Amur Honeysuckle. Attractive, large shrub with white blossoms erect along the branches. Handsome scarlet fruit. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

3 to 4 ft. high ........................................ $1.00 $1.25

4 to 5 ft. high ........................................ $1.25 $1.50

5 to 6 ft. high ........................................ $1.50 $1.75

L. TATARICA. Tatarian Honeysuckle. A large, broad shrub with pink or white flowers in May. In July and August it is heavily laden with currant-like fruit, much to the delight of robins and cardinals. It is one of the first shrubs to leaf out in the spring. A good shrub for screening. Each 10

4 to 5 ft. high ........................................ $1.00 $1.25

LYONIA (ANDROMEDA) LIGUSTRINA. He-Huckleberry. Handsome shrub with white flowers and highly colored autumn foliage. Usually 2 to 3 feet tall. Each 10

1½ to 2 ft. high ........................................ $0.75 $0.90

MYRICA CAROLINENSIS. Northern Bayberry. You probably have admired the rounded masses of glossy foliage of the Bayberry, as it embellishes the dry hills and sand-dunes of Long Island. The gray, wax-covered berries were used by the early settlers in making candles. Good foliage. Fine for dry ground. Each 10

1 to 2 ft. high. Seedlings .............................. $0.50 $0.75

2-ft. clumps (with ball) ............................... $1.00 $1.25

PHILADELPHUS, BOULE D'ARGENT. Fountain-like garden. Any well-drained soil with average fertility is suitable. Handsome scarlet fruit. Each 10

PHILADELPHUS, VIRGINAL. Fragrant Spring. This is considered by many to be one of the best of the later introductions. It has highly fragrant, crested, double, white flowers. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

3 to 4 ft. high ........................................ $1.00 $1.25

PHOTINIA VILLOSA. Chinese Christmas Berry. Large shrub, with a profusion of white flowers in May and clusters of red berries in autumn. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

3 to 4 ft. high ........................................ $1.00 $1.25

4 to 5 ft. high ........................................ $1.25 $1.50

7 to 8 ft. high ........................................ $1.50 $1.75

PRUNUS GLANDULOSA. Flowering Almond. Small shrub with pink or white flowers. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

P. MARITIMA. Beach Plum. This grows native on the sand-dunes, even on the ocean-side and inland sandhills and plains. If you have failed with other plants try this. Each 10

1½ to 2 ft. high ........................................ $0.50 $0.75

3 to 4 ft. high ........................................ $1.00 $1.25

P. TOMPENTOSA. Nanking Cherry. A low, round shrub about 4 feet high, with myriads of bright pink flowers in May. Each 10

2 to 3 ft. high ........................................ $0.75 $0.90

3 to 4 ft. high ........................................ $1.00 $1.25

RHAMNUS FRANGULA. Glossy Buckthorn. Large shrub with leaves dark green on upper side, paler beneath, fading to yellow, orange, and red. Berries change from red to black in September. Each 10

1 to 2 ft. high ........................................ $0.50 $0.75

2 to 3 ft. high ........................................ $0.75 $0.90

2 to 3 ft. high ........................................ $1.00 $1.25

RHODOTYPOS KERRIOIDES. Jetbead. Also known as White Kerria. A shrub growing 6 feet high, with single white flowers in May. Decorated in fall and winter with large, shining black berries. Light green foliage. Each 10

P. CORONARIUS. Sweet Mock Orange. The big, sweet white flowers that you remember. It makes a shrub 8 to 10 feet high, gracefully arching under its border of white flowers in late May or early June. Each 10

2 to 3 ft. high ........................................ $0.60 $0.75

3 to 4 ft. high ........................................ $0.75 $0.90

P. FALCONERI. Star Mock Orange. A large, graceful shrub with wide-spreading, arching branches. Flowers pure white, of starry aspect, borne in great profusion. Each 10

2 to 3 ft. high ........................................ $0.50 $0.75

3 to 4 ft. high ........................................ $0.75 $0.90

P. GRANDIFLORUS. Big Scentless Mock Orange. A tall shrub with large, white flowers in June. Each 10

5 to 6 ft. high ........................................ $1.50 $1.75

P. MAGDALENÆ. Magdalenæ Mock Orange. Spreading shrub with single, white blossoms. Each 10

6 to 8 ft. high ........................................ $1.50 $1.75

2 to 3 ft. high ........................................ $0.75 $0.90

2 to 3 ft. high ........................................ $0.75 $0.90

SALIX CAPREA. Goat Willow. Many of us can associate happy memories with the Pussy Willow. It forms a small hardy tree with upright branches. Catkins very numerous, appearing before the leaves in early spring. Each 10

5 to 7 ft. high ........................................ $2.00 $2.25

S. VIRGINALIS. Fragrant Sumac. One of the few low, drought-resistant shrubs for dry banks and edging tall shrubs. Grows 2 to 5 feet high, with trailing stems. Its trifoliate leaves, like the poison ivy, turn a brilliant red late in the season. Bears brilliant orange-red berries in autumn. Each 10

3 to 4 ft. high ........................................ $0.50 $0.75

5 to 6 ft. high ........................................ $0.75 $0.90

SALIX CAPREA. Goat Willow. Many of us can associate happy memories with the Pussy Willow. It forms a small hardy tree with upright branches. Catkins very numerous, appearing before the leaves in early spring. Each 10

3 to 4 ft. high ........................................ $0.75 $0.90

5 to 6 ft. high ........................................ $1.00 $1.25

8 ft. high .............................................. $2.00 $2.25

2 to 3 ft. high ........................................ $0.75 $0.90

SORBARIA ARBOREA. Tree Spirea. A shrub growing 8 feet high, with odd-pinnate leaves of many double blades. Large, white flower-clusters in midsummer when other shrub flowers are scarce. Each 10

3 to 4 ft. high ........................................ $0.75 $0.90

5 to 6 ft. high ........................................ $1.00 $1.25

[46]
THE SPIREAS

Showy, free-flowering shrubs of inestimable garden value. In general, they are graceful, compact bushes of great hardi¬ness. The Van Houtte Spirea is one of the best.

SPIREA ARGUTA. Garland Spirea. Flowers pure white, borne in great profusion in early spring. Similar to, but more vigorous than S. Thunbergi. Each 10
1 to 2 ft. high .................. $0.50 $4.00

S. BUMALDA, ANTHONY WATERER. The flat heads of carmine flowers appear in early July and at intervals during the season. If seed-pods are cut off, it will bloom all summer. Grows 3 feet high. Excellent for massing at edge of shrub border. Each 10
1 to 2 ft. high .................. $0.50 $4.50

S. DOUGLASI. Douglas Spirea. Shrub 6 to 8 feet high (callosa alba). Its fluffy, lace-like flowers rose-pink in May. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

S. JAPONICA OVALIFOLIA. Japanese Spirea. A low plant, with flat clusters of white flowers similar in form to Anthony Waterer. Each 10
1 to 2 ft. high .................. $0.50 $4.00

S. PRUNIFOLIA FL.-PL. Bridal Wreath. An old-fashioned shrub, with straight, upright twigs covered with little, double, white, rose-like flowers early in May. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

S. REEVESIANA FL.-PL. Double Reeves Spirea. Tall, graceful, arching shrub with white flowers in June. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

S. THUNBERGI. Thunberg Spirea. Its fluffy, lace-like flowers are borne in great profusion in early spring. Similar to, but more vigorous than S. Japonica. Each 10
1 to 2 ft. high .................. $0.50 $4.00

S. TOMENTOSA. Hardhack. Flowers rose-pink in narrow, dense spike 3 to 6 inches long. Grows about 4 feet high. Each 10
1½ to 2 ft. high .................. $0.50 $4.00
3 to 4 ft. high .................. $0.75 $7.00 $65.00
4 to 5 ft. high .................. $1.00 $9.00

S. TRICHOCARP. Native of Korea. Dome-shaped habit, 4 to 6 feet high. Flowers borne in 3 to 4-inch, broad, compound clusters at ends of short, leafy branchlets, transforming the bush into a fountain of white. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00
3 to 4 ft. high .................. $1.00 $9.00

S. VANHOUTTEI. Van Houtte Spirea. One of the best shrubs for the landscape. During the middle of May it will bloom all summer. Its foliage is graceful and good during the summer. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

S. VEITCHI. Veitch Spirea. Handsome shrub with long, arching branches and white flowers. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

STEPHANANDRA FLEXUOSA. Cutleaf Stephanandra. Good for hedging, or bordering tall shrubs. Billowy masses of foliage are very graceful. Each 10
2 to 3 ft. high .................. $0.50 $4.00
3 to 4 ft. high .................. $0.75 $7.00 $65.00

STYRAX JAPONICA. Japanese Styrax. A little tree with dark, privet-like leaves and graceful, horizontal branches. About the middle of May it is covered with waxy, white flowers like orange-blossoms. Each 10
3 to 4 ft. high .................. $1.50 $12.50
4 to 5 ft. high .................. 2.00 $17.50
5 to 6 ft. high .................. $2.00 $17.50

SYMPHORICARPOS RACEMOSUS. Common Snowberry. Grows 3 feet high, with berries like white marbles in September and October. Valuable for edging down shrubbery or covering banks. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

S. VULGARIS. Coral Berry. Low, arching shrub with deep red berries. Good for bank plantings. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00

SYMPLOCOS PANICULATA. Himalayan Lilac. A rare shrub, valuable for the robin's-egg-blue berries in September and October which attract the birds. An unusual shrub for your collection. Each 10
1½ to 2 ft. high .................. $0.75 $7.00 $65.00

SYRINGA (Named Varieties). Lilac. Beloved for beauty of flower and fragrance, but it is best not to depend on Lilacs for foliage. They need heavier soil than that on most of Long Island.

ALPHONSE LAVALLE. Double. Mauve. Each 10
BLEUATRE. Single. Blue. Each 10
CHARLES X. Single. Reddish mauve. Each 10
CONDORCET. Double. Light blue. Each 10
CONGO. Single. Deep red-purple. Each 10
DE HUMBOLDT. Single. Dark purple. Each 10
EKINEA. Blue. Each 10
LAMARTINE. Single. Blue. Each 10
LUDWIG SPAETH. Single. Dark purple. Each 10
MARECHAL DE BASSOMPIERRE. Double. Dark carmine-rose. Each 10
MARIE LEGRAYE. Single. White. Each 10
MME. ANTOINE BUCHNER. Double. Light pink. Each 10
MME. JULES FINGER. Double. Large; pink. Each 10
MME. LEMOINE. Double. White. Each 10
MME. ANTOINE BUCHNER. Double. Light pink. Each 10
PRESIDENT GREVY. Double. Blue. Each 10
PRINCE DE BEAUVEAU. Double. Large; red-violet. Each 10
PYRAMIDAL. Double. Blue. Each 10
SENATEUR VOLLAND. Double. Rosy red. Each 10
VILLE DE TROYES. Single. Purple. Each 10

S. EMODI. Himalayan Lilac. Its chief merit is its lateness, flowering after the Common Lilac, but without its fragrance. Pink flowers. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00
3 to 4 ft. high .................. 1.00 $9.00
4 to 5 ft. high .................. 1.50 $12.50

S. PERSICA. Persian Lilac. Graceful shrub with arching branches and pale lilac flowers. Splendid for hedges. Each 10
2 to 3 ft. high .................. $0.75 $7.00 $65.00
4 to 5 ft. high .................. 2.00 $17.50

HICKS NURSERIES, WESTBURY, N. Y.
SYRINGA VILLOSA. Late Lilac. A tall shrub with pale, rosy lilac flowers in June. Each $0.50 $4.00

S. VULGARIS. Common Lilac. One of the oldest and most popular varieties of shrubs. Flowers lilac, purple, and white. Blooms in May. Each $0.75 $7.00 1 to 2 ft. high 2 to 3 ft. high 3 to 4 ft. high

VACCINIUM COROMBOSUM. High-bush Blueberry. A native species abundant on Long Island. The beauty of the Blueberries as an ornamental shrub on the uplands is known to but few. The red tips of twigs in winter give an effect similar to red-twigged dogwood. Each $1.50 $12.00 1 to 2 ft. high 2 to 3 ft. high 3 to 4 ft. high 3 to 4 ft. high

THE VIBURNUMS

Hardy shrubs with showy flowers and foliage. Most species produce a profusion of attractive berries in clusters.

VIBURNUM ACERIFOLIUM. Maple-leaf Viburnum. For shady locations. White flowers in June; black berries. Each $0.75 $7.00 2 to 3 ft. high

V. CARLESI. Fragrant Viburnum. Among early-flowering shrubs, this is Korea’s great gift to our gardens. The round clusters of flowers, waxy in texture, are pink tinted in the bud and pure white when expanded, filling the air around with a fragrant clove scent. Each $1.00 $9.00 1 to 2 ft. high 2 to 2½ ft. high 3 to 4 ft. high

V. DENTATUM. Arrow-wood. Large shrub 8 to 12 feet high, with white, flat-topped flower-clusters in May and blue berries in October. Each $0.75 $7.00 3 to 4 ft. high 4 to 5 ft. high

V. DILATATUM. Arrowwood. Large shrub with dainty white flowers in dense, elongated clusters of white flowers. Very showy. Each $1.00 $9.00 3 to 4 ft. high

V. LANTANA. Wayfaring Tree. A European shrub with leaves that are whitish beneath, and bright red fruits in July and August, which later turn black. Each $0.75 $7.00 2 to 3 ft. high 4 to 5 ft. high

V. LENTAGO. Nannyberry. Large shrub with dark green leaves, white flowers, and blue-black fruit. Each $1.00 $9.00 3 to 4 ft. high 4 to 5 ft. high

THE WEIGELAS

These are justly classed among the showiest of flowering shrubs. Those listed are vigorous-growing varieties.

WEIGELA CANDIDA. Snow Weigela. A fine, vigorous shrub with yellowish white flowers. Each $0.75 $7.00 2 to 3 ft. high

W. EVA RATHKE. Has crimson flowers that cover the whole bush. It begins to bloom in late May, and continues to flower for several weeks. Each $0.75 $7.00 2 to 3 ft. high

W. ROSEA. Rose-colored Weigela. Most popular variety with pink bells in May and June. Each $0.75 $7.00 2 to 3 ft. high

ZANTHORHIZA APIIFOLIA. Tallow-root. A cover plant for shady places. Grows 1 foot high, and has inconspicuous brownish flowers in April. Each $0.50 $5.00 1 ft. high

ZENOBIA PULVERULENTA. Dusty Zenobia. Low shrub with white blossoms in dense, elongated clusters, resembling huge, dense clusters of Lily-of-the-Valley. Each $0.75 $7.00 2 to 3 ft. high

Berry-bearing Shrubs Furnish Food for Birds

All winter long the thickets are alive with the birds that get their food from the berry-bearing shrubs. You can make the birds contented if you grow berry-bearing shrubs around your place. Then you can study them from your window and enjoy their songs. The birds will stay as long as the berries are there, so have plenty. John Burroughs said that insect-eating birds would starve if they did not have berries. You may notice that in early spring, before the angle-worms come up, the robins feed on berries. Make a border of berry-bearing shrubs, or add them to your present border. Ask for list of berry-bearing shrubs and quantity prices.
A border planting of Flowering Shrubs. Is not this the best way to separate your property from your neighbor’s? You have beauty of flowers and berries and the joy of watching the birds make merry amongst the various textures of foliage. We can send you a shipment or truck-load of shrubs almost any time of the year.

The group of shrubs with graceful foliage and white, waxy berries at left of path is Snowberry. This and its cousin, Coralberry, are valuable shrubs for edging of groups of taller shrubs and for covering banks.
VINES

INES are Nature's lace. The grace and beauty of well-placed vines add untold value and charm to the home landscape.

The uses of vines in the landscape are as varied as of any other class of plants. They quickly cover buildings, trellises, fences, pergolas, walls, stumps, and bare banks of sand or clay. The laundry-yard and tennis-court may be screened by vines on a wire trellis. Many of them are attractive for flowers, foliage, and fruit. They may be used to vary the occasional monotony of long stretches of shrubbery, when few shrubs are in bloom, by clambering over them, arranging themselves in a picturesque, tumbling mass of brilliant foliage, flower, or berry effect. Another use is for covering the ground under trees and shrubs. They are mutually helpful. For best results, it is a good plan to work into the surface soil, at the base of the vines, a quantity of rotted compost in the fall or early spring.

Most of the plants listed can be planted all summer for they are available in pots.

ACTINIDIA ARGUTA. Bower Actinidia. This Asiatic vine is as vigorous as a wisteria, and similar in habit of growth. It has elliptical leaves about 5 inches long. The large, white flowers are like those of the orange tree, styrax, or philadelphus. It has edible, double fruit like the gooseberry. Potted plants, $1 each.

AMELOPSIS QUINQUEFOLIA. Virginia Creeper.

Have you ever noticed, on Long Island, tall tree-trunks looking like burning pillars of fire before you thought the summer was over? It is the Virginia Creeper. This vine has five leaflets and black berries, while the "poison-ivy vine," growing in similar situations, has but three leaflets and white berries. You can add it to the shrubbery, to give touch of color, without taking up much room, or you can let it climb up trees, forming graceful draperies in both summer and autumn. Excellent for covering walls and sandy banks. 1 to 2-ft. potted plants, 75 cts. each.

A. QUINQUEFOLIA ENGELMANNI. Engelmann Creeper. Improved variety of Virginia Creeper having shorter joints and smaller and thicker foliage. It is also better equipped with tendrils for clinging to rough stone or brick support. 10 to 12-in. potted plants, 75 cts. each.

A. TRICUSPIDATA (var culta). Japanese Creeper. A rampant-growing, hardy vine, clinging firmly to walls. Its rapid gain in popularity is the result solely of its merits. It stands city conditions perfectly, and needs only to be started in a crack in the pavement. The three-parted green leaves change to crimson and scarlet in fall. 2 to 6-in. potted plants, $1 each.

A. TRICUSPIDATA LOWI. A variation from Japanese Ivy, with smaller, deeply cut leaves, giving it a distinct grace and elegance. Clings to smooth surfaces without support. Potted plants, $1 each.

CLEMATIS PANICULATA. Sweet Autumn Clematis. One of the showiest of vines, blooming in late August, when it makes a great snow-drift of white. It is a rampant grower, one vine covering a space 20 feet long and 10 to 20 feet high. Holds its fluffy, downy seeds until midwinter. It advertises its own merits and has no faults. Potted plants, 75 cts. each.

EUONYMUS RADICANS VEGETUS. Big-leaf Winter-creeper. An evergreen vine with round, thick, leathery leaves about 1 inch in diameter. It will make a branchy little bush about 2 feet high or climb like a vine. Euonymus will clamber up the trunks of trees and branch out widely, adorning it with its rich shadows and clusters of bright red berries. It will cover up brick or cement house foundations that have harsh lines, and it delights in finding the cracks and crannies of a rough stone wall. Under trees and shrubs it will serve as a cover-planting and brighten the winter landscape. Vigorous plants, 75 cts. each.

HEDERA HELIX. English Ivy. An evergreen vine commonly known and worthy of planting, even if it does occasionally winter-kill. It thrives best where it is partially shaded; the brilliant March sun burns the leaves. It can be used on tree-trunks, on the north side of buildings, and for carpeting the ground. Potted plants $1 each.

HYDRANGEA PETIOLARIS. Climbing Hydrangea. A vigorous, tall-growing vine, the stems ascending by means of aerial rootlets. Odd and valuable for covering walls and trunks of trees. Flowers creamy white, in loose, flat-topped clusters 8 inches across. Plants, 15-in. tops, from 4-in. pots, $1.25 each.

LONICERA HENRYI. Henry Honeysuckle. The leaves stay bright green all winter. It is a new variety, described as the hardest evergreen vine in New England. Potted plants, $1 each.

L. JAPONICA BRACHYPODA AUREA. Golden Hardy-leaf Japanese Honeysuckle. Same as Hall's but golden-colored foliage. Potted plants, $1 each.

L. JAPONICA HALLIANA. Hall's Japanese Honeysuckle. This is thoroughly at home in the woods, along hedge-rows and road-banks where the birds scatter the seed about and it comes up in patches. The foliage remains green until midwinter, or if grown on the ground, until spring. The hummingbirds and children like the honey, and you will like the fragrance in June and autumn. It is often the cheapest thing to cover a bank, where they may be mixed with climbing roses, Virginia creeper, and low shrubs. The ability of Japanese Honeysuckle to take complete possession of the ground results in economy of maintenance. Potted plants, $1 each.

POLYGONUM AUBERTI. China Fleece Vine. A rapid-growing new vine, with festoons of white similar to clematis. Potted plants, 75 cts. each.

WISTERIA FLORIBUNDA VIOLACEO-PLENA. A beautiful double-flowering variety with long, violet-blue racemes. Potted plants, $2 each.

W. SINENSIS. Chinese Wisteria. The old favorite that climbs to the tops of the tallest trees, festooning them with fragrant flowers in early May. Feeds itself with nitrogen from air and is therefore always dark green. Here is a chance to make a big display at little expense. The flowers are blue.

| Plants from 6-in. pots | $1.00 |
| Plants from 7 to 10-in. pots | 1.50 |

W. SINENSIS ALBA. White Chinese Wisteria. A variety of the preceding with white flowers; otherwise of the same habit.

| Plants from 5-in. pots | $1.00 |
| Plants from 6 to 7-in. pots | 1.50 |
ROSES

THE Rose has always elicited praise from mankind, for from the earliest times it has had a part in myth, legend, and literature. It was probably the first flower cultivated for ornament or for perfume. In beauty and fragrance the Rose stands alone, supreme—the Queen of Flowers. None is so poor he may not possess a Rose.

In selecting a suitable location for the Rose-garden, preference should be given to a sunny, well-protected situation. While they thrive in a wide range of soils, it pays to prepare the ground properly before planting. Dig out the bed 1 1/2 feet deep and add an abundance of well-rotted manure and bonemeal to the soil before refilling. The plants may be set 2 to 3 feet apart. Budded plants should be placed so that the joint is 3 inches below the surface. In summer, keep the soil hoed deeply; in winter, hill up the earth and add strawy manure to a depth of 1 foot; in the spring, cut off the dead tips and thin out the branches. A good book on Rose-culture will more than repay its cost.

Our list consists of varieties chosen for beauty, hardiness, and vigor of growth.

Potted Plants for Summer Planting

Most of the Roses offered here are available in pots for summer planting. The prices for potted Roses are slightly higher than those quoted. There is a lot of fun in selecting plants in full bloom because you have the satisfaction of comparing and getting the shade most desired. Other balled and potted plants also are available.

Climbing Roses

These are particularly happy on Long Island. Their grace and beauty are admirable for covering masses of objectionable formation. Dead walls and embankments can be made into things of beauty. Roses can be used to clamber through the shrubbery, to make hedges with or without the fence as a support, and to climb up tree trunks on lawn or through the woods. Climbing Roses harmonize with any surroundings and take care of themselves. There seems to be no limit to their usefulness. The blooming season extends through June and July. Be sure to use them liberally in your landscape.

Hybrid Tea Roses

This is the most popular class of garden Roses. They are the offspring of the Hybrid Perpetual and Tea Roses which have been developed toward hardiness as much as possible. The flowers are similar to those you buy from the greenhouse. They bloom from about the middle of June to the last of July; then they rest a bit, save for a few blossoms, until the end of August, starting once more and blooming until frost. Protect during the winter by mounding up 1 foot high after freezing, mulch with strawy manure or leaves to keep frozen. Enrich with bonemical and hoe thoroughly.

75 cts. each, $7 for 10

ALBERIC BARBIER. Cream-white.
ALIDA LOVETT. Shell-pink.
AMERICAN BEAUTY. Carmine.
AVIATEUR BLERIOT. Saffron-yellow.
CHRISTINE WRIGHT. Wild-rose-pink.
DOROTHY PERKINS. Pink or white.
DR. HUEY. Crimson-maron.
DR. W. VAN FLEET. Cream-pink.
EMILY GRAY. Golden buff.
GARDENIA. Cream-yellow.
GOLDEN EMBLEM. Intense yellow.
GRUSS AN TEPLITZ. Brilliant crimson.
JACOTTE. Orange-yellow.
MARY LOVETT. Pure white.
MARY WALLACE. Large; bright pink.
MME. EDOUARD FERRIOT. Orange-red.
PAUL'S SCARLET CLIMBER. Scarlet.
PURITY. White.
SILVER MOON. Large; white.
STAR OF PERSIA. Bright yellow.
TAUSENDSCHON. Rose-pink.

DAME EDITH HELEN. Clear pink.
DOROTHY PAGE-ROBERTS. Coppery pink and apricot.

ALEXANDER HILL GRAY. Pale lemon-yellow.
ANGELE PERNET. Brownish orange.
ANTOINE RIVOIRE. Silvery pink.
BETTY. Pale buff and pink.
BETTY UPRICHARD. Orange and carmine.
CHATEAU DE CLOS VOUGEOT. Glowing red.
CHEERFUL. Shining pink.
CLEVELAND. Old-rose and copper.
COLUMBIA. Bright pink.
CONSTANCE. Yellow.
DAME EDITH HELEN. Clear pink.
DUCHESS OF WELLINGTON. Saffron-yellow.
ETOILE DE FEU. Orange-pink.
ETOILE DE FRANCE. Crimson.
ETOILE DE HOLLANDE. Brilliant red.
FEU JOSEPH LOOYMANS. Yellow and apricot.
FRANCIS SCOTT KEY. Light crimson.
GENERAL MACARTHUR. Crimson-scarlet.
GENERAL SUPERIOR ARNOLD JANSSEN. Light crimson.
GEORGE C. WAUD. Light red.
GOLDEN EMBLEM. Intense yellow.
GOLDEN OPHELIA. Golden yellow.
The Rose will probably always remain a favorite flower. If it is your wish to establish a Rose-garden, we offer a large list of select and worthy varieties.
HYBRID TEA ROSES, continued

GRUSS AN TEPLITZ. Brilliant crimson.
HADLEY. Crimson-red.
HARRY KIRK. Straw-yellow.
HOOSIER BEAUTY. Dark red.
HUMBOLDT. Bright pink.
INDEPENDENCE DAY. Flaming yellow.
JOHN RUSSELL. Carmine-pink.
JONKHEER J. L. MOCK. Carmine-pink.
KAISERIN AUGUSTE VIKTORIA. Snow-white.
KILLARNEY. Sparkling pink.
LA FRANCE. Bright pink.
LADY ALICE STANLEY. Coral-red and pink.
LADY ASHTOWN. Pink with yellow glow.
LADY HILLINGDON. Deep saffron-yellow.
LADY INCHIQUIN. Orange-cerise.
LADY PIRRIE. Coppery pink.
LADY URSULA. Bright pink.
LOS ANGELES. Salmon-pink and yellow.
LOUIS CATHARINE BRESLAU. Reddish orange.
LUXEMBOURG. Creamy yellow.
MABEL MORSE. Clear yellow.
MISS AMELIA GUDE. Peach-yellow.
MISS CYNTHIA FORDE. Sparkling pink.
MISS LOLITA ARMOUR. Copper and orange.
MISS ROWENA THOM. Fiery rose.
MME. BUTTERFLY. Pink.
MME. CAROLINE TESTOUT. Satiny rose.
MME. EDOUARD HERRIOT. Orange-red.
MME. JULES BOUCHE. White.
MME. LEON PAIN. Salmon-pink.
MRS. AARON WARD. Tawny gold and pink.
MRS. ALFRED TATE. Coppery salmon.
MRS. CHARLES BELL. Shell-pink.
MRS. GEORGE SHAWYER. Clear rose.
MRS. W. C. EGAN. Flesh-pink.
OPHELIA. Creamy white and pink.
PADRE. Copper-scarlet.
RADIANCE. Rose-pink.
RED COLUMBIA. Deep red.
RED RADIANCE. Deep rose-red.
REV. F. PAGE-ROBERTS. Golden yellow and red.
ROSE HILL. Satiny pink.
ROSE MARIE. Clear pink.
ROSELANDIA. Golden yellow.
SOUVENIR DE CLAUDIUS PERNET. Yellow.
SOUVENIR DE GEORGES PERNET. Orange-pink.
SUNBURST. Yellow and orange.
TALISMAN. Scarlet, orange, and yellow.
WHITE KILLARNEY. Pure white.
WILHELM KORDES. Golden salmon.
WILLOWMERE. Rich pink.

Hybrid Tea Roses in Standard or Tree Form

These are the product of grafting or budding choice varieties of Hybrid Tea Roses on a tall stem. A year in advance, a stem of a hardy, vigorous type of Rose is pruned and trained, so that it will form a straight shoot. The stem should be wrapped in straw early in the winter, to prevent injury.

$3.50 each, $32.50 for 10

GOLDEN EMBLEM. Intense yellow.
GRUSS AN TEPLITZ. Brilliant crimson.
HADLEY. Rich crimson-red.
KAISERIN AUGUSTE VIKTORIA. Snow-white.
LOS ANGELES. Salmon-pink and yellow.
MABEL MORSE. Clear yellow.
MME. BUTTERFLY. Pink.
MME. CAROLINE TESTOUT. Satiny rose.
MME. EDOUARD HERRIOT. Orange-red.
MME. JULES BOUCHE. White.
MME. LEON PAIN. Salmon-pink.
MRS. AARON WARD. Tawny gold and pink.
MRS. ALFRED TATE. Coppery salmon.
MRS. CHARLES BELL. Shell-pink.
MRS. GEORGE SHAWYER. Clear rose.
MRS. W. C. EGAN. Flesh-pink.

Hybrid Perpetual Roses

These are the more hardy class of Roses which produce big, double blooms during the month of June, commonly called “June Roses.” They require about the same culture as the Hybrid Teas, and, while harder, winter protection should be given.

$1 each, $9 for 10

FRAU KARL DRUSCHKI. Snow-white.
GENERAL JACQUEMINOT. Clear red.
PAUL NEYRON. Lilac-rose.
ULRICH BRUNNER. Carmine-red.

Rose Species (Shrub-Like Habit)

ROSA HUGONIS. Delicate, single yellow flowers in long, arching sprays in May along with the lilacs. It develops into a bush 6 feet high and 6 feet wide. A rare Rose named for Father Hugo who discovered it in China. Plant it wherever a delicate, showy flowering shrub is needed—near the lilacs it gives a particularly pleasing effect because they bloom at same time. $1.50 each, $12.50 for 10.

R. WICHURAIANA. Memorial Rose. Wide shrub with long, slender, creeping branches. The glossy bright foliage forms a beautiful background to the profusion of white blossoms with golden stamens. At home on rocky or sandy banks. Our best Climbing Roses are hybrids from R. wichuriiana. 75 cts. each, $7 for 10.

ROSA RUGOSA. Red, pink, and white varieties. An upright shrub with spreading branches, densely beset with spines and prickles. Fruit large, bright red, very effective. Handsome, healthy foliage all summer. Needs no protection in winter. 75 cts. each, $7 for 10.

R. WICHURAIANA. Memorial Rose. Wide shrub with long, slender, creeping branches. The glossy bright foliage forms a beautiful background to the profusion of white blossoms with golden stamens. At home on rocky or sandy banks. Our best Climbing Roses are hybrids from R. wichuriiana. 75 cts. each, $7 for 10.
HARDY GARDEN FLOWERS

The interest in flowers was never so widespread as it is at the present time. It prevails among all classes, from the humble possessor of a few plants which are grown in flowerpots within the confines of the city, to the owner of acres in the country. Hardy perennials are of easy culture and thrive in any garden soil. No home landscape is complete without them. Anyone owning a bit of ground can have a garden.

In planning a flower-garden, the first requirements are beds of a width for a hoe to reach the middle, or narrower, and paths. It can be of formal or informal design. For best results, prepare and fertilize the soil before planting. Avoid soil robbed by tree-roots. A water-supply should be available. Where there is not room for a separate garden, wonderful effects can be obtained by using them to blend off groups of shrubs and evergreens. We will gladly help you design a planting that will be a joy throughout the flowering season.

For summer planting, we have many Perennials, Lilies, and Roses growing in pots, which we sell at slightly increased prices; or you can go out in the field and select the colors and plants you like. They will be dug in full bloom and placed in paper pots or boxes for you to take home.

Plants marked with * are Rock-Plants

35 cts. each, $3 for 10, $25 per 100, unless otherwise noted

ACHILLEA PTARMICA, BOULE DE NEIGE. Yarrow. All summer. Cream. Medium.  
A. PTARMICA, THE PEARL. Sweetcress. All summer. White; double. Medium.

R. NITIDA. Summer. Yellow. Tall.
*SAGINA SUBULATA. Pearlwort. All summer. Green moss. Low.
SALVIA AZUREA. Azure Sage. Fall. Blue. Tall.
The Rock-Garden has become an important feature of the home landscape. Perennials of low growth are the best materials to use. Plants marked with * are rock-plants. Add a few dwarf evergreens, bulbs, etc., and you have a garden that will be a delight all the year. A wall can be changed from a commonplace essential into a detail of beauty by removing an occasional stone to make pockets in which to place perennials of low growth.

Such a border as this never lacks interest because something is aglow all the while. You have flowers, and plenty of them. The charm of the hardy perennial border is perpetual. It costs less to maintain, and you can plant in large masses. Being treated as a unit, it is continually in bloom. Come to Hicks Nurseries and get something which is coming into bloom to add to or remodel your borders.
SCABIOSA CAUCASICA. Pin-cushion Flower. Summer. Lilac. Medium.
*S. SPECTABILE. Shaggy Stonecrop. Late summer. Rose. Medium.
*S. SPECTABILE. Showy Stonecrop. Late summer. White Stonecrop.

*TUNICA SAXIFRAGA. Saxifrage Tunic Flower. All summer. Pale pink. Low.
T. MINUS ADIANTIFOLIUM. Maidenhair. Meadow Rue. Spring. White and yellow. Tall.
THERMOPSIS CAROLINIANA. Carolina Thermopsis. Summer. Yellow. Tall.

MISCELLANEOUS ITEMS

Bulbs for Fall Planting

Prices will be quoted previous to the fall planting season on—

TULIPS DAFODILS CROCUS GRAPE HYACINTHS
HYACINTHS SNOWDROPS

Increased interest has been taken in the culture of early spring flowers, especially the bulbous plants. This popularity is certainly justifiable, for the early-flowering bulbs—the harbingers of the spring—serve as reminders that the dark, dull days of winter are over and that spring is again at hand.

No matter how small the area, there is room to plant a few bulbs. It is a common error to attempt to grow a few bulbs of each of many kinds. This desire should be tempered with discretion, for it is not in the display of a number of different kinds that the best taste is found, but rather in the choice of a few kinds and in the arrangement and massing of those for effect.

In planting bulbs, a safe general rule to follow is to cover a bulb or corm with about twice its own depth of soil. The distance between bulbs will vary according to the size and type of the bulbs: Tulips, 4 inches apart; Hyacinths, 6 inches apart; Crocuses, 2 inches apart; Daffodils, 6 inches apart; Snowdrops, 2 inches apart. Best results are obtained when the soil is prepared in advance of the time of planting.

THALICTRUM AQUILEGIFOLIUM. Meadow Rue. Spring and early summer. White. Medium.

GRASS SEED. 50 cts. per lb.

Prepared Fertilizers for General Use

We have available prepared Fertilizers in 1-pound cartons and 5 to 100-pound bags. This prepared plant-food is properly balanced and complete. It supplies the nourishment required for vigorous growth and to bring fruit, flowers, and foliage to full development. 25 cts. up, according to quantity.

HOW TO MAKE A LAWN

Early spring and later summer are the best times to make a lawn.

(1) Fork up the area 6 inches deep, turn over sod, and break up with back of fork. Remove all stones, etc.
(2) For best results, scatter a fertilizer over the dug surface—well-rooted stable-manure or prepared fertilizer.
(3) Smooth soil by drawing a rake back and forth until in fine condition.
(4) Sow the seed. Use 1 pound to 200 square feet for quick results.
(5) Rake the ground once more very lightly.
(6) Roll the seeded area.
(7) All soils contain weed seeds, many of which start to grow along with the grass. Close cutting will kill most of them; those that remain must be taken out and the holes filled with good soil having grass seed mixed with it.
The white bells are Campanula persicifolia, with edging of Dianthus bordering garden walk

Beds of Iris separating vegetable garden from lawn—an attractive, economical low hedging

This garden vista, bordered with hardy flowers, is on the estate of John W. Davis, Locust Valley, N. Y. A flower border of this type can be located in almost any position. You can arrange to have a show from early bulbs to the Hardy Chrysanthemums in November
FRUITS AND BERRIES

DON'T fall down on your fruit-planting. Doctors and dietitians are constantly advising the necessity of including fresh fruit in the daily diet. The only way to be sure of getting fresh fruit is to grow your own. The average home-grounds can produce sufficient quantity for the family use without a great deal of care and effort. You, or your little boy or girl, can do the planting.

With careful planning and selection of the various fruits, it is possible to satisfy your needs throughout most of the year.

Take your car and run over to Hicks Nurseries and get a bundle of fruit trees and berry bushes that will make you mighty glad you came when you start eating the fruit next year.

STANDARD APPLES

For family use there is no fruit that is more indispensable; no fruit more healthful. Its period extends nearly or quite through the year. Three or four carefully selected trees will furnish a supply almost the year through.

Standard Apples should be spaced about 30 feet apart; by keeping them cut back, you can put them closer on a limited area.

For fertilizer, use lime, bonemeal, and wood-ashes; also decaying matter such as manure, leaves, or grass.

2-yr. trees, $1.25 each, $10 for 10

Duchess. Yellow, striped with red. Summer.
McIntosh. Dark red. Autumn.
Rhode Island Greening. Greenish yellow. Winter.
Wealthy. Dark red. Autumn.
Yellow Transparent. Pale yellow. Summer

CRAB-APPLES

The common idea concerning Crab-apples is that they are pretty miniature Apples of more or less astringency, and fit only for making jellies and preserves. They are also, however, handsome, free-flowering trees, and an asset to the landscape.

2-yr. trees, $1.25 each, $10 for 10

PEARS

The Pear, when grown to full perfection, is distinguished for its great delicacy, its melting and juicy texture, and its mild, rich, and delicious flavor. It requires rather heavy loam soil for best development. No great amount of pruning is necessary, but the limbs should be kept thinned out sufficiently to let in the sunlight freely, and the head kept well balanced. Standard Pears make narrow trees 15 feet wide until they get thirty years old. Space 20 feet apart.

2-yr. trees, $1.50 each, $12.50 for 10

Beurre Bosc. Russet; large. October, November.
Clapp's Favorite. Yellow. August.
Kieffer. Yellow; coarse. November, December.
Seckel. Small; brown; juicy. October.
Sheldon. Large; russet; coarse. October.

CHERRIES

Cherry trees will thrive in nearly all good soils, but a dry soil is preferable. They will not thrive in moist places, and soon perish. The birds like Cherries, but don't let them scare you from planting them. It is eminently a lawn tree. Any place where you can enjoy the blossoms and shade will yield good Cherries.

2-yr. trees, $1.75 each, $15 for 10

Black Tartarian. Juicy; purplish black. Late June.
Gov. Wood. Light yellow; red cheek. Late June.
Napoleon's Bigarreau. Large; pale yellow or red. July.
Early Richmond. Dark red; sour. Early June.
Montmorency. Early; red; sour. June.
English Morello. Late; red; acid. Late July.
PEACHES
Any soil producing good garden crops is adapted to Peach trees, provided there is a well-drained subsoil. They require a space only 10 by 10 feet, and bear about eighteen months after planting. Fertilize with wood ashes or potash. Borer is troublesome but controlled by para-dichlorobenzene treatment.

4 to 5-ft. trees, 75 cts. each, $6 for 10

BELLE OF GEORGIA. White. August.
CRAWFORD EARLY. Yellow. August.
CRAWFORD LATE. Yellow. September.
ELBERTA. Yellow. August.
J. H. HALE. Yellow. August.
MT. ROSE. White. August.
OLDMIXON. White. September.
ROCHESTER. Yellow. August.
STUMP. White. September.

PLUMS
Plums attain their greatest perfection on heavy soil, being then most free from disease. Japanese Plums are especially vigorous, but the flavor is not so good as that of the European varieties. To insure a full crop, more than one variety should be planted, especially the Japanese varieties, as they are not bi-sexual.

2-yr. trees, $1.50 each, $12.50 for 10

*ABUNDANCE. Bright cherry-red. August.
*BURBANK. Large; yellow; red cheek. August.
*GERMAN PRUNE. Purple; sweet. September.
*RED JUNE. Red and yellow. Earliest.
*WICKSON. Yellow. September.

QUINCES
The Quince flourishes in any good garden soil. It is hardy and compact in growth, requiring but little space—10 feet for each tree. One to six trees are enough for family use.

3 to 4-ft. trees, $1.50 each

CHAMPION. Large; bright yellow; long-keeping.

GRAPES
Grapes are easily grown by anyone, and on the smallest bit of ground. There is room along any garden fence or walk for a dozen vines, to furnish this most delicious of fruits for home use from August to November. Training on the sides of buildings is recommended over the house or garage.

The vines will fruit under unfavorable conditions, but good culture, pruning, and spraying pay, if fruit of best quality is desired. Prune back severely so but few branches grow. Space 6 feet apart on trellis.

2-yr. vines, 50 cts. each, $4 for 10

NIAGARA. White.
CONCORD. Black.
DELAWARE. Small; red; sweet.

RASPBERRIES
Raspberries are an essential in the home garden. The plants should be set in rows 6 feet apart and 3 feet apart in the row. The principal attention is to hoe up the extra suckers, leaving a few stalks to each hill. All old wood should be cut out and burned as soon as the crop is off.

1-yr. plants, $2 for 10, $12 per 100

CUTHBERT. Large; red.
ST. REGIS. Everbearing. Red.
PLUM FARMER. Black.

BLACKBERRIES
Being easy to grow, Blackberries are a valuable fruit for home use. As they ripen from early July to the middle of August, they complete the season of small fruits until the peaches come. Prune as with raspberries. Plant in rows 6 by 3 ft.

1-yr. plants, $2 for 10, $12 per 100

FREE HARVEST. Of medium size; good quality; very early.

CURRANTS
Currants are easily grown and are naturally fruitful. Ten plants are enough for a small family. Space 5 feet apart.

2-yr. bushes, 50 cts. each, $4 for 10

CHERRY. Deep red.
FAY'S PROLIFIC. Large; red.

GOOSEBERRIES
Gooseberries thrive in any garden soil and are very satisfactory for home use.

2-yr. bushes, 50 cts. each, $4 for 10

DOWING. Pale green; medium to large; very good.

ASPARAGUS
A bed of to 100 plants will supply an average family. Plant 10 inches apart, in rows 4 feet apart. Set in the fall or spring, with the crown of the plant about 5 inches below the surface of the ground. 2-yr. plants, $4 per 100.

RHUBARB
Very satisfying in the spring when the body seems to have a craving for acid foods. Plant 3 feet apart. Six plants are usually enough. Plenty of rich manure must be used for good results. 35 cts. each, $3 for 10.

FILBERTS AND HAZELNUTS
CORYLUS AMERICANA. American Hazelnut.

IMPROVED EUROPEAN FILBERT (Early Globe, Red Lambert, Buttrn's Zeller).

C. COLURNA. Constantinople Hazelnut. A tree Hazel from Europe with edible nuts.

C. COLUMN. Constantinople Hazelnut. A tree Hazelnut from Europe with edible nuts.

10 to 12 ft. high. $10 00 90 00

IMPROVED EUROPEAN FILBERT (Early Globe, Red Lambert, Buttrn's Zeller). Each 10

2 to 3 ft. high. $1 25 $1 00
